"Words make legends."

Everyone of us live to succeed. In our journey of life from womb to tomb, we are respected and remembered by the entire world by the words that we speak. Words make a man complete. Certainly words are true emotions of our inner self that overflows spontaneously which enables others to realize our ideas.

Success is a word that always fills ourself with energy and makes us to utilize our potentials. A question now arises is whether our words can alone make us successful. We are familiar with many politicians orating something which would be contrast to their inner intensions. Orating some words is different from orating our inner intensions. The world before us shows a large number of examples who are always alive in our minds for their words and deeds.

Starting from Abraham Lincoln who had always succeeded in making his thoughts a reality, though he faced many failures at his beginning stage he had a strong believe in his words. As Winston Churchill said "Attitude is a small thing

that makes a big difference." Yes our deeds and words are governed by our attitude. Every positive attitude can overcome a negative situation. Words play a very important role in developing a positive attitude.

Even book reading is a mode in which we interact with a new world of words that impart us an inner satisfaction and in fact an answer to many of our inner dilemmas.

Francis Bacon has said, "Reading makes a man complete from inside." Inspiration is something which can change us totally from what we were to something new in future. Inspiration is a rocket fuel that makes our ordinary days extraordinary. Our former president Dr APJ Abdul Kalam who quoted that "The ignited mind of youth is the most powerful resource." These words would enable any Indian to realize what we are and would definitely make us to contribute towards nation making.

In this 21st century words are with us almost from the time we begin to take our first breath till our last breath. Education is the best way that makes ^{to make an} extraordinary ~~an~~ personality. As Bertrand Russell said that ~~it is a~~ "Education is an approach to new ideas in a different manner. Yes, Education is not only a way of being but an art of becoming. Apart from a academic pursuit

It is a moral pursuit. Good words makes a good personality. But how we make ourselves speak good and act good? The answer is education. Education in this century, is not a matter of tension and is available to anyone. But just eating the books like worms and following the syllabus just for the sake of marks would never make us successful. Bill Gates, the founder of Microsoft was a college dropout, but he became successful. It is just because he considered education as a source of morality. If Immanuel Kant have said that education is for making a man of morality. Words make a successful man and the words make a that personality in us which can alter the course of thoughts that the whole world believes in.

Education is an ethical enterprise. When we receive the right education in the right manner then only we would be a right man.

Martin Luther King, the messiah of the blacks in Africa was a man whose words were thundering and had the power which could alter life of millions. He was a person who dreamt to fulfill the dreams of thousands of Africans and this thought made his words unique and his deeds extraordinary.

H.W longfellow says in his poem
'The Psalms of life'

"Tell me not in mournful numbers that
life is an empty dream."

These lines can make any one who was
hopeless or about their life into a new
person who can get a new dimension about
life. Yes, words have that power that enable
us to establish a new thought that can
change the persisting thought of our society.

When we say that words make
a person successful, we never think that words
can sometime make someone's life hell.
Yes, we are provided with everything,
everything that can make us successful and
something that can spoil us. When we
are in the path of hell we may follow those
words which will spoil us which includes
bad books and improper usage of our
social sites. It is noted that in the present
generation many of them use their potential
for terrorists, just thinking that it is
the right for them.

Here is the significance of right education. As Abraham Lincoln have said, "whatever you are, be good you are." We should try to keep a goodness factor in everything that we undertake, then only we can step to success. Paulo Coelho says in his book 'The Alchemist' that whenever you want to achieve something, the whole world conspires you to achieve that. Yes when we dream to succeed then the universe is supporting us by words to achieve our target.

Success can be simply defined as the fruit of hardwork. Yes this fruit can be achieved only by right thoughts and right perspective. Success lies in how we perceive things. Perception is indeed a true factor that makes our life filled with happiness and joy.

Life would be successful when we nurture it with good thoughts and when we speak good words. We shall always try to succeed by being a good role model for the future generation by main changing our deeds and thoughts for the sake for a good world. As Napoleon Hill said, "The starting point of success is desire." By changing our thoughts and words, we can

change our world.
