

The Impact of Social Media On Democracy

'Humans' are the greatest inventors of the world'. This was again made true with the invention of social media in the twenty first century. In the past few decades there is a great advent of social media. It controls ~~but~~ not only human life but even their acts, views, principals and ideas. Social Media is also having great potency in democracy too.

'Democracy' its not a mere word but the back bone of the Indian society and the great country, India. India is a democratic country. The country gives its people to convey their ideas, their opinion about the decision taken by the government, to analyze the plans

put forward by the politicians and social activists.

After the invention of social media everything has become easier and much handy. The people of India use social media, these days is not just something where people can find pleasure and connect with their loved ones.

It had already become platforms of raising the voice against the evils and superstitions still existing in the society. It has also giving great opportunities to the people to react and convey their messages, ~~and~~ opinions on different measures taken by the government without minding or lending their ear to the country people.

~~Democr~~ India is a democratic country. These are the words that every Indians

have heard. In the past decade the potency of social media is also evident in the democracy and the democratic growth of the country, India.

In early times onward the people with power ruled India. The people were suppressed by the power of the strong over the weak. They were not allowed to say anything and were pushed to work for the powerful people. Social media helped them to have a identity, to say something for themselves.

The Democracy of India are sometimes forgotten and the dangerous politics drives the country. The politics ~~an~~ plays a major role in the running of ~~their~~^{our} country. 'Politics' in the present society can be defined as a group of people working for their benefits and for power to their

thereby controlling the weak people. With the help of social media people are able to find the real and the correct politicians with rational and balanced mind who works for the welfare of the people. Thereby fulfilling their right to vote and selecting the accurate representative.

Social media is 'Right of form Association' is not of the right of an individual given by the government of india. Social media helps the people to connect with their old friends, relatives, well wishers. It also connects people having same ideas, opinions and same views about concepts. It helps them to protest against the violence and wrong decision taken by the government.

People is the ~~to~~ one of the four ~~is~~ essential parts needed for the formation of a state'. In addition to the boundary, territory, government, people or the population plays the a major role in the development of the country. The country reaches the zenith of development and growth when its people become vigilant and starts performing the duties properly. Social media helps the people to do their duties correctly. Social medias such as Whatsapp, Instagram, Facebook awares them to perform their duties, correct their mistakes if they are making or had made one. It ~~is~~ is beneficial to the population to connect with themselves and others and to exchange the information given by the government relating to the duties that are to be performed within in a time limit.

~~As a coin~~ 'A coin has two sides'. Likewise the social media is also having negative and positive effects on the people which in turn ~~it~~ will have bad effects on the country and its democracy.

It is the duty of the ~~inn~~ citizens to perform their fundamental duties such as ~~per~~ respecting national flag, national anthem, to protect the natural resources and its diversities. Excessive use of social media has affected and is still affecting the minds of people and leading to the misunderstanding and forgetting their duties. Through social media people are getting ~~it~~ attracted to the diversities of other countries and finding pleasure in ~~it~~ them. This ~~it~~ sometimes leads them to misbehave with their national flag and anthem. Excessive use makes them forget about the country.

'Freedom' is one of the thing that modern man
wishes to get. The country gives its people the
'Freedom'. But there are ~~poor~~ people in many parts
of the country who lacks freedom, who find
it hard and impossible to come out from the
clutches and express their feelings. For them
social media opens a new door to come out
and speak for themselves.

Students are "Today's children forms the tomorrow
of India"

By Jawaharlal Nehru.

Students who are the cream of the society and
pillars of the nation should be aware of their
country and the essentials parts the strengthen the
country. Students are the upcoming citizen and so
also the politicians who are going to govern
the country in the future. The use of social media

makes the students aware of the right and duties to be performed thus strengthening the democracy of the country in the future.

'Unity in Diversity' These are the words with which is having the suitable meaning 'India' India, being a country with more than twenty states and having nineteen languages recognised by the government in addition to the ones which are not recognised is having diversities in its nook and corner. There are many religions existing in the particular country too. Social media is one of the many things that connects the people irrespective of their diversities. The voice of people are being always alarmed together irrespective of

of diversities because of the ~~advent~~ influence of the social media.

Everything in this world is having its negatives and positives. Social media can ~~aff~~ adversely effect not only the human life but also the ~~bas~~ its basic structures which constitutes the elements of both man and its country. Social media can sometimes be a silent killer that drags everything to its end. The peace of mind, the devotion to duty, self discipline should be built with utmost care. But the use of social media can effects all of these like a ray of light with in a fraction of second. ^{Therefore} Everyone should be aware of the dangerous elements that can lead to the verge of losing everything.
