William Shakespeare

William Shakespeare was born in April 1564. He was an English play writer poet and actor he is widely regarded as the greatest writer in the English language and the world's greatest the dramatist he is often called England's National poet and the barrel see ever his extract works including collaborations consists some 39 plays 154 sonnets three long narrative poems and a few other versus sum of uncertain whether his place have been translated into every major living language and are performed more often than other playwright. his works continue to be studied and reinterpreted. Shakespeare was born and raised in stratford-upon-avon Warwickshire. At the age of 18 he married Anne Hathaway with whom he had three children Susana and twins ham nut and Judiet sometime between 1585-1592 he began a successful career in London as an actor writer and part owner of a ply company called the lord chamberlain's men.

-
- Later known as the kingsman at the age of 49 he appears to how he tried to Stratford where he died three years later Shakespeare Shakespeare produced most of his non works between 1589 and 21613 his early place where primary comedies and histories and are regarded as some of the best works produced in this genres .He then wrote mainly tragedies until 1608, among them halmet ,Romeo and Juliet , Othello,king Lear,and macbeth , all consider to be among the finest work in the English language. In the last phase of his life he wrote tragicomedies also known as romances and collaborated with other playwrights.
-
- Many of Shakespeare's plays were published in editions of varying quality and accuracy in his lifetime. However in 1623 fellow actors and friends of Shakespeare's John hemmings and Henry cancel published a more days and it was known as the first folio ,a posthumous collected edition of Shakespeare's dramatic works that included all but 2 of his plays it's prephase was a prescient poem by Ben Johnson that hailed Shakespeare with the now famous epithet "not of an age ,but for all time"
- Death:23 April 1616

IT QUIZ

1). Which is the programming language exclusively used for artificial intelligence?

Ans: Prolog

2).Number of layers in the OSI (open system interconnection) model?

Ans: 7

3).Which company developed Mac operating system?

Ans:Apple

4).Which is the first fully supported 64 bit operating system?

Ans: Linux

5).In computer world Trojan refers to?

Ans: Malware

6).Which protocol is used to received email?

Ans: POP3

7).In which year '@' sign was first used and for its use in email address?

Ans:1972

8).A computer use which type of number system to calculate and to store data?

Ans: Binary

9).Which key combination is used to minimise all open windows and displays in the screen?

Ans:Windows key + D

10).Longhorn was the codename of?

Ans: Windows Vista

IMPORTANTS OF EDUCATION

: Education teaches the ability to read and write. Reading and writing is the first step in Education. Most information is done by writing. Hence, the lack of writing skill means missing out on a lot of information. Consequently, Education makes people literate.

Above all, Education is extremely important for employment. It certainly is a great opportunity to make a decent living. This is due to the skills of a high paying job that Education provides. Uneducated people are probably at a huge disadvantage when it comes to jobs. It seems like many poor people improve their lives with the help of Education.

The Importance of Education Education is an important issue in one's life. It is the key to success in the future and to have many opportunities in our life. Education has many advantages for people. For instance, it illuminates a person's mind and thinking. It helps students to plan for work or pursue a higher education while graduating from university. Having education in an area helps people think, feel, and behave in a way that contributes to their success, and improves not only their personal satisfaction but also their community. In addition, education develops human personality, thoughts, dealing with others and prepares people for life experiences. It makes people have a special status in their own society and everywhere they live in. I believe that everyone is entitled to have education "from cradle to grave". There are various benefits of having education such as having a good career, having a good status in society, and having self-confidence. First of all, education gives us the chance of having a good career in our life. We can have plenty of chances to work at any workplace we wish. In other words, opportunities for a better employment can be more and easy. The highly educated we are the better chance we get. Moreover, education polishes our mind, reinforces our thoughts, and strengthens our character and behaviors toward others. It equips us with information in various fields in general and our specialization in particular; especially what we need to master in our job career.

Therefore, without education we may not survive properly nor have a decent profession. Furthermore, education grants us a good status in society. As educated people, we are considered as a valuable source of knowledge for our society. Having education helps us teach others morals, manners and ethics in our society. For this reason, people deal with us in a considerable and special way for being productive and resourceful. In addition, education makes us a role model in society when our people need us to guide them to the right way or when they want to take a decision. Thus, it is an honor for us to serve our community and contribute towards its advancement. In fact, being educated is an advantage to help our people and build a good society. Besides, it is very well-known that having self-confidence is always generated from education. It is a great blessing for us to have self-confidence which leads to many advantages and success in life. For example, it helps us manage specific tasks, tackle life's challenges and maintain positive stands. Additionally, having self-confidence is typically based on proper education; paving the path for us to success. Accordingly, self-confidence makes us aware of how well we perform a task or a range of actions. In short, being educated is undoubtedly being self-confident and successful in life. All in all, education is the process of acquiring knowledge and information that lead to a successful

MAGIC BOX

future. As discussed above, there are a lot of positive traits of having education; such as having a good career, having a good status in society, and having self-confidence. Education makes us view obstacles as challenges to overcome with no fear; facing new things. It is the main factor behind successful people and the merit of developed countries. Therefore, education is deemed a real success behind any future success.

THREE KINGS AND THREE SISTERS IN THE SKY

Orion's Belt or the Belt of Orion, also known as the Three Kings or Three Sisters,[1] is an asterism in the constellation Orion. It consists of the three bright stars Alnitak, Alnilam and Mintaka

ALNITAK

Alnitak (ζ Orionis) is a triple star system at the eastern end of Orion's belt and is 1,260 light-years from the Earth. Alnitak B is a 4th-magnitude B-type star which orbits Alnitak A every 1,500 years. The primary (Alnitak A) is itself a close binary, comprising Alnitak (a blue supergiant of spectral type O9.7 and an apparent magnitude of 2.0) and Alnitak (a blue dwarf of spectral type O9V and an apparent magnitude of about 4). Alnitak is estimated as being up to 28 times as massive as the Sun, and to have a diameter 20 times greater. It is the brightest star of class O in the night sky.

ALNILAM

Alnilam (ϵ Orionis) is a supergiant, approximately 2,000 light-years away from Earth and magnitude 1.70. It is the 29th-brightest star in the sky and the fourth-brightest in Orion. It is 375,000 times more luminous than the Sun.[5] Its spectrum serves as one of the stable anchor points by which other stars are classified.

MINTAKA

Mintaka (δ Orionis) is 1,200 light-years away and shines with magnitude 2.21. Mintaka is 90,000 times more luminous than the Sun. Mintaka is a double star. The two stars orbit around each other every 5.73 days.[6]

LOST IN THE HISTORY

(prehistoric animals)

Because the era known as prehistoric covers the hundreds of millions of years before the first humanlike creatures, existed, most prehistoric animals have never been seen by humans. Prehistoric animals evolved in two ways. Early, very simple kinds of animals gradually changed into new and more complex kinds; and the process of adaptation enabled some animals to survive in all parts of the Earth.

While some prehistoric animals died out completely, becoming extinct, the descendants of others are still living on Earth. The best-known extinct animals are dinosaurs, huge animals that disappeared about 65 million years ago. Sponges, corals, sea stars (starfish), snails, and clams—all familiar creatures today—can be traced back 500 million years or more. Spiders originated almost 400 million years ago. Insects and sharks also have long histories

Dinosaurs dominated the Earth for more than 150 million years and then vanished. Scientists have many theories to explain this fact. Some say that when flowering plants appeared on Earth about 200 million years ago, they increased the amount of oxygen in the atmosphere, causing dinosaur breathing rates and heartbeats to increase to the extent that the creatures burned themselves out. Other theorists suggest that the dinosaurs were poisoned by plants they ate. Still others say that The huge animals began to die off after the Earth's continents, which had originally been a single landmass, broke apart, causing tremendous environmental changes, submerging huge areas, and radically changing the climate. A more recent theory states that a giant meteor struck the Earth, exploded, and filled the atmosphere with debris for many years. This debris darkened the skies and blocked out the sunlight. The resulting lower temperatures on Earth caused the extinction of many animals.

Scientists have learned a great deal about prehistoric life by studying animal skeletons or shells. At times they have found bones and pieced them together. Often the remains were petrified (turned to a stony hardness) and discovered as fossils.

THE FIRST LAND ANIMALS

MAGIC BOX

At the beginning of the Devonian period, the Earth's surface changed as the continents drifted into new arrangements. Deep seas replaced shallow ones, and there was more dry land. Early forms of plants were algae, lichens, and probably mosses.

By that time, the structure and habitats of fishes were changing. Some forms, 2 to 3 feet (0.6 to 0.9 meter) long, also lived in pools on land. Called crossopterygians, or lobe-fins, they had bony heads, sharp teeth, and simple lungs as well as gills. If the pools were fouled by decaying vegetation, these fish raised their heads to breathe air. If the pools dried up, the fish used their thick, short fins to crawl over strips of land that still contained small pools of water.

Amphibians, the descendants of certain crawling fishes, developed legs from fins and could move more easily. The first amphibians probably looked like salamanders, 3 to 4 feet (0.9 to 1.2 meters) in length, with sharp teeth and wide heads.

During the next 50 million years, plants and animals changed greatly. About 280 million years ago, at the end of the Coal Age (Carboniferous, or Pennsylvanian, period), trees as much as 100 feet (30 meters) in height and 6 feet (1.8 meters) in diameter grew in swampy forests. Cockroaches grew 4 inches (10 centimeters) long, and dragonflies were enormous.

Labyrinthodonts also lived during the Coal Age. They were amphibians that may well have been the ancestors of all land vertebrates (animals with spines), including human beings. Some had body structures like...

say no to tobacco for a safer future

The scope of the burden of disease and death that cigarette smoking imposes on the public's health is extensive. Cigarette smoking is the major focus of this chapter because it is the central public health problem, but the topics of secondhand smoke exposure, smoking of other combustible tobacco products, smokeless tobacco, and electronic nicotine delivery systems (ENDS) are also considered. The magnitude of the public health threat posed by cigarette smoking stems from two factors: (1) the prevalence of cigarette smoking is so high, and (2) smoking causes so many deleterious health effects. A policy change that reduces the prevalence of cigarette smoking will result in a commensurate reduction in the population burden of disease and death caused by cigarette smoking. The associations between cigarette smoking and the adverse health effects caused by smoking are dose-dependent (HHS, 2014). Thus, a public health benefit would be realized if a policy change led to reduced exposure to cigarette smoke via means other than reducing the prevalence of smoking. For example, additional reduction in the population burden of smoking-caused disease and death will be generated if the policy also results in delayed initiation of cigarette smoking. The population health benefit from delayed initiation, although potentially large, will be less than the benefit from a commensurate reduction in smoking prevalence because delayed initiation is associated with reduced exposure to cigarette smoking rather than with the complete prevention of the exposure. A decrease in the prevalence of cigarette smoking will have additional downstream benefits by reducing the potential for nonsmokers to be exposed to secondhand tobacco smoke.

YOUR BEST

If you always try your best

then you'll never have to wonder about what you could have done if you'd summoned all your thunder

And if your best was not as good As you hoped it would be

you still could say I gave today

All that I had in me

Life is precious

The gracefulness of a butterfly

How gentle

and fragile they seem

Gentle fluttering on a calm summers day, floating like a dream

But sadly there time is over hardly before

it's begun

So enjoy your special moment

like a butterfly

in the sun

MATHEMATICS IN DAILY LIFE

Mathematics is a deliberate utilization of issue. Moreover, the subject of Mathematics is one of the main subjects of our life. Regardless of which field or calling you to have a place with, its utilization is all over. That is the reason it is essential to have a decent comprehension of the subject. Even though the essentials of mathematics start from school; Envisioning our lives without it resembles a boat without a sail. You may be shocked to realize that we use mathematics consistently, even without knowing it. From dialing numbers on the telephone to giving cash for making the installments, our reality is encircled by mathematics. So let us see what sway this subject has made on our lives This is where various mathematics ideas are applied, and accordingly, the specialists need to have a decent agreement and order of the subject. Taking care of the bank's exchanges isn't straightforward, and you have to have some information on mathematics to keep up your record, store and pull out cash, and so forth. On the off chance you wish to advance, you have to consider the interest you should pay and the month to month premium you would need to pay. The financial area is identified with maths; thus, even the clients should be acquainted with it. लता मंगेशकर

लता मंगेशकर (28 सितंबर 1929 – 6 फ़रवरी 2022) भारत की सबसे लोकप्रिय और आदरणीय गायिका थीं, जिनका छः दशकों का कार्यकाल उपलब्धियों से भरा पड़ा है। हालाँकि लता जी ने लगभग तीस से ज्यादा भाषाओं में फ़िल्मी और गैर-फ़िल्मी गाने गाये हैं लेकिन उनकी पहचान भारतीय सिनेमा में एक पार्श्वगायिका के रूप में रही है। अपनी बहन आशा भोंसले के साथ लता जी का फ़िल्मी गायन में सबसे बड़ा योगदान रहा है। लता का जन्म एक कर्हाडा ब्राह्मण दादा और गोमंतक मराठा दादी के परिवार में, मध्य प्रदेश के इंदौर शहर में सबसे बड़ी बेटी के रूप में पंडित दीनानाथ मंगेशकर के मध्यवर्गीय परिवार में हुआ। उनके पिता रंगमंच एलजी के कलाकार और गायक थे। इनके परिवार से भाई हृदयनाथ मंगेशकर और बहनों उषा मंगेशकर, मीना मंगेशकर और आशा भोंसले सभी ने संगीत को ही अपनी आजीविका के लिये चुना।

हालाँकि लता का जन्म इंदौर में हुआ था लेकिन उनकी परवरिश महाराष्ट्र में हुई। वह बचपन से ही गायक बनना चाहती थीं। बचपन में कुन्दन लाल सहगल की एक फ़िल्म चंडीदास देखकर उन्होंने कहा था कि वो बड़ी होकर सहगल से शादी करेगी। पहली बार लता ने वसंत जोगलेकर द्वारा निर्देशित एक फ़िल्म कीर्ती हसाल के लिये गाया। उनके पिता नहीं चाहते थे कि लता फ़िल्मों के लिये गाये इसलिये इस गाने को फ़िल्म से निकाल दिया गया। लेकिन उसकी प्रतिभा से वसंत जोगलेकर काफी प्रभावित हुये।

पिता की मृत्यु के बाद (जब लता सिर्फ़ तेरह साल की थीं), लता को पैसों की बहुत किल्लत झेलनी पड़ी और काफी संघर्ष करना पड़ा। उन्हें अभिनय बहुत पसंद नहीं था लेकिन पिता की असामयिक मृत्यु की कारण से पैसों के लिये उन्हें कुछ हिन्दी और मराठी फ़िल्मों में काम करना पड़ा। अभिनेत्री के रूप में उनकी पहली फ़िल्म पाहिली मंगलागौर (1942) रही, जिसमें उन्होंने स्नेहप्रभा प्रधान की छोटी बहन की भूमिका निभाई। बाद में उन्होंने कई फ़िल्मों में अभिनय किया जिनमें, माझे बाल, चिमुकला संसार (1943), गजभाऊ (1944), बड़ी माँ

MAGIC BOX

(1945), जीवन यात्रा (1946), माँद (1948), छत्रपति शिवाजी (1952) शामिल थी। बड़ी माँ में लता ने नूरजहाँ के साथ अभिनय किया और उसके छोटी बहन की भूमिका निभाई आशा भोंसले ने। उन्होंने खुद की भूमिका के लिये गाने भी गाये और आशा के लिये पार्श्वगायन किया। 1947 में वसंत जोगलेकर ने अपनी फ़िल्म आपकी सेवा में में लता को गाने का मौका दिया। इस फ़िल्म के गानों से लता की खूब चर्चा हुई। इसके बाद लता ने मज़बूर फ़िल्म के गानों "अंगरेजी छोरा चला गया" और "दिल मेरा तोड़ा हाय मुझे कहीं का न छोड़ा तेरे प्यार ने" जैसे गानों से अपनी स्थिती सुदृढ़ की। हालाँकि इसके बावजूद लता को उस खास हिट की अभी भी तलाश थी।

1949 में लता को ऐसा मौका फ़िल्म "महल" के "आयेगा आनेवाला" गीत से मिला। इस गीत को उस समय की सबसे खूबसूरत और चर्चित अभिनेत्री मधुबाला पर फ़िल्माया गया था। यह फ़िल्म अत्यंत सफल रही थी और लता तथा मधुबाला दोनों के लिये बहुत शुभ साबित हुई। इसके बाद लता ने कभी पीछे मुड़कर नहीं देखा।

THE WORLD OF MUSIC

Music is like a universal language of life. It is basically the sound that is brought together through the harmony of various instruments. Our life would have been totally empty and different without music. It is something that every human being enjoys. It is a very powerful thing. Music helps to destress, heal, and motivate. If you are looking for a short essay on music, then take a look at the short essay given in the following. This is created by the in-house exports of Vedantu keeping the understanding ability of the students. Those who are looking for references can look up to this following essay. It will be easy to figure out the pattern of how to write an essay on music. One can also download the Vedantu app to get access to the same file. Music Essay for Students “Without music, life will be a mistake” the statement of Friedrich Nietzsche, a German philosopher, simplified the importance of music in one’s life so easily. Music has a magical impact on humans. It’s the best form of magic. The origin of the word ‘music’ is the Greek word ‘mousike’ which means ‘art of muses’. Music is a form of art and artists decorate it. The music consists of lesser words with deeper meanings. Frequently people use music as a painkiller to escape from the pain of life. ‘Musical Notations’ is the leading form to write music. This provides a reference to an artist so he can share with others if necessary. Music is a mood freshener and accompanies us in our pocket devices, on televisions, movies, and the most effective in live concerts. Different forms of music have different effects on human nature. Music is the greatest creation of mankind in the course of history. A combination of deem lights and calm music encourages the listener to eat less and enjoy the food more. Listening to music positively in a car influences one’s mood leads to safer behaviour and fewer road rages ultimately minimising accidental destructions. If the students love the music, it helps them in recalling the information more significantly along with improvement in verbal intelligence. The studies have found that listening to favourite songs helps fibromyalgia patients to experience less chronic pain. Music has a direct effect on our hormonal levels. Listening to music decreases the level of the hormone cortisol in our body and counteracts the effect of chronic stress. The heart-touching music is nothing but creativity with the purest and undiluted form. The combination of vocal or instrumental sounds in such a way

MAGIC BOX

that it produces beauty and expresses emotions. Anyone can make their day by enjoying music by listening or by composing or by playing. The global facts say parents intensively use music to soothe children even to interact. Music touches the heart through the ears. It has divine power to act as an energy booster. Some music assists in motivation while some play the best role in sympathy. Music helps us to fight insomnia. Listening to classical or relaxing music, just before going to bed, improves one's sleep. Though music helps to counteract depression and loneliness, people underestimate the impact of music on the human mindset in the age of irony age. On the other side of the coin, there are some types of music that can result in deleterious effects on the human mind and body. Listening to music with high decibels can damage neurons. The effect on the brain subjected to continuous exposure to electronic amplification of rhythmic music is similar to that of drugs.

KERALA DISASTERS

‘Kerela disaster relief-rise of the sons of the sea as superheroes in the ocean of humanity’

During the flood time the whole world witnessed the heroic efforts of the sons of the sea. They rescued many lives no other companies could do much when the flood affected people asking help. The ability to ride boats, the swimming skill, the knowledge about flow of water and inside are etc... enabled the fisherman to rise to the occasion. They did not earn anything from anyone. The empathy in them for the brothers and sisters in distress made them forget their worries. They could save many domestic animals and many people. They took them all to safe centres. They were the real superheroes. The whole people of Kerala are indebted to them. Their effort will be remembered by the people. They take a space everyone's heart.

ALWAYS SHARE

John was a selfish boy. He never shared his toys with anyone. His parents were worried as how to teach him about kindness and sharing. Then one day, John was returning from school on his new bicycle. As John was watching, a boy fell into

MAGIC BOX

a ditch and hurt himself. The boy cried, "ah! can't move my arm". John would never help anyone but that day, he felt sad for the boy, so, he rushed to him and helped him stand up. He said to the boy, "looks like you have fractured your hand. Sit behind me and I'll ride you to the hospital". Later, that evening, the boy's parents visited John and thanked him, "you are a very kind boy. God will always bless you". After they had left, John's father said, "son, see the blessings you received by being kind and sharing." John understood the importance of being kind and decides to share always. "sharing is the best moral value".
