

Money is not life.

Lucy and Luka, they were twins. They were rich and kind. They were living very happily. But, after days passes a bad habit were popped between them. which was making more money and spending it on expensive things, and they became greedy. Their kindness were faded away. They became rude to each other. One day Luka were went for walking in a park, and he wore an expensive foot wear, he wants to show his richness to others. Every body in the park were busy playing and jogging. Some kids were playing and sunning, suddenly a boy fell down in a muddy land

and some muddy water were splashed on Luka's shoes. The boy were afraid and he was hurt too. Luka scolded the boy and he only thought about his shoes not the boy. The boy started to cry, his mother rushed to him. She made him calm. She said to Luka that "are you blind with the money you have, my son were unaware of your costly foot wear, and he also hurt, it was an accident." Luka thought about his fault that he done to that boy. He apologised to the mother. He realized money is not everything money will go and come, but our inner humanity and love towards others would never let fade. After he reached home, he said about the incident which happened in the park to his sister Lucy

and made her understand the value of love and affection we have to show towards others and money is nothing more important than a loving and caring heart.
