What we as Students can do to build a New Kerala.

Kerala, the god's own country. But for many years Kerala and Keralites are suffering and fighting to social evils and certain norms that still exist. Natural calamities and poverty stole many lives.

It is not wanted to build a 'New Kerala' with indigenous art and tradition. Instead, we need a healthy and peaceful society.

Kerala was famous because of its climate, various landscapes etc. One of the major way of income of Kerala is tourism. But also famous for pollution. To build a Kerala with hygiene and disease-free we have to place wastebins in roadsides. It has to be cleaned and removed everyday. Common washrooms and ~~toilets~~ ^{toilets} should be constructed. As students, we can advise others not to throw waste in public places. And we also have to follow those.

In India, Kerala has more literacy rate than other states. But Keralites face unemployment and poverty. The education providing by the state should include vocational education. This will help to increase the number of childrens coming to school. Also helps to attain economic development. Nowadays, some of the schools are giving food to oldage homes. it is asked to provide food from the students. If this continuous, gradually a New Kerala without oldage homes will emerge. As the students spending time with those who are left by their childrens. They are watching and hearing their sorrows.

We have to spend time of for such small things and have to understand the hardworks of parents. Start to love them more than anyone else. Let's stand together to wipe out the sorrows and save our parents from being alone in an unknown place. If your parents are uncivilised, uneducated who face

poverty and shame because of this, we have to teach them basics. Let our parents also be the part of the mission 'New Kerala with complete literacy'.

On this digital world the importance of digital literacy also increases. Our schools and classrooms are now developed with hightech facilities. We have to study and understand the uses of technology. Maybe some of our teachers who have experience in the field of teaching but lacks digital literacy. Students are studying the about the information and technology from school from its basics. We have to teach them how to connect computers with projectors, how to print etc with respect and love.

We can also help our grand Parents to take cash from ATM, to fill applications for bank and pensions purposes. We have to protect them from being cheated by the strangers. Let's bring our grandparents to new generation.

Our new generations including students in Kerala were fell into the trap of drugs. In schools, students were conducted anti-drug awareness rallies, performed dramas in streets and yelling to stop the use of drugs. But no one cares. Drugs sellers were killing the future of the country and the next upcoming citizens of nations. We have to say no to drugs. The movies were supporting the drugs and smoking by depicting as a heroism. Such movies has to be banned and the parents have to make sure that their kid is safe. We have to advice our friends, classmates and neighbours not to use drugs. Even after our warnings, they are not listening it. We should inform the responsible persons without thinking for a minute. Just think about the future of your dearest ones. Do not encourage smoking because it not only kills the user but also those who stand nearby. It doesn't mean't to encourage drinking. Both of these causes

cancer and other health issues. Remember it is illegal and dangerous to health. Only we together can stop the hunting of drugs over students. Only students can save the future.

'Navakerala' project was started by the government to build a new Kerala. We as students can do something more than anyone to build a new Kerala.

Kerala was widely teased because of the condition its roads. We have to rewrite this by asking reconstruction of roads. Plastics pollute cars and cause hazardous issues in environment. As we know it will never decay in soil and water. Therefore, we can use a plastic base for the construction of roads before tarring. It was asked to students to submit projects on different subjects. We have to inform about the maintenance of roads, schools, host hospitals etc

Caste system, discrimination and stereotypes are the next problem faced by our society. These problems are passed along through generations. We do not talk about caste to anyone in a teasing manner. Those discriminations are being ridiculous to the society with new generation. Do not spread such thoughts. Religion is to connect people not to put aside. This generation has the ability to think and work. We have to remove discrimination on the basis of caste, religion, creed, race, gender etc. from our society to clean it and helping it to be fresh like new everytime.

Do not spread and be set stereotypes. Not only mens can earn also women can. Not only womens can cook tasty foods also men can. Such stereotypes should be prohibited. We should not believe and don't create stereotypes. If we want to build a new Kerala these factors must be removed

from our society.

We do not kill ourselves by cutting trees and harming nature by unscientific practices.

In Kerala, we haven't yet faced water and food scarcity. If this continues it will too happen. Do not destroy our forest resources and water resources.

In the name of development we are destroying our precious water resources which are abundant in Kerala.

Deforestation will perish the natural resources and cause natural calamities. Kerala have already

witnessed tsunami in 2004, the great flood in 2018 and landslide in wayanad. All these are caused

little by human's unscientific practices of nature.

We have to understand the nature is wealth of our nation. The only home we had. Love and protect our home from being diminished. Motivate and inspire

people to begin agriculture on their homes. Let our New Kerala be a green place as "haritha keralam"

All these together can only build a New Kerala. An anti-drug, non-polluted, without old age home, ^{with} literary and digital literacy, well constructed roads, schools and hospitals, discrimination and evil-free society with non poisonous food can build a 'New Kerala' by real. These factors are challenging the state for being developed. Let's make a decision to stand together strongly to takeoff these and to attain our dream, the real dream of Kerala to be a 'New Kerala'. Sustainable development can only be a real development. As a student we have the responsibility to build a healthy and peaceful society which leads to a complete change with new happy Kerala, really a god's own country.
