TOPIC: THE VISION FOR A NEW INDIA

India of my Dreams

"If you ever need a helping hand, there is right one at the end of your arm" - these are some wise words which should be inculcated in every person's mind. What is the actual purpose of living? just let the summer, winter, autumn, spring beautifully passing through us ~~or~~ and just be a living corpse? of course not right, as we are human beings, have the ability to think, create wonders in the world, even we are capable of creating revolutionary changes in the world! yet feeling useless? Yes it is just inborn quality (not a good one) for just thinking as a useless person and we have many more to do. One of them

(Note: Graded Items may be published in **Schoolwiki**. So write neatly. Don't fold paper. Don't write overleaf)

would be creating a 'vision' for India? It sounds great right? but not so great as it is not easy to alter each and every sector of India and to giving them a new face is very difficult as we have our own aches and cough takes up the central stage, right?

So what can we do now? As we all know our country is a country with lots of traditions, culture, language and it is quite diverse right! and India can be divided into different sectors, For example:- Education, Health, Economy, etc... and each sector of India should be modified and should have certain visions to be a well developed country and the country we should be proud of, right?

So each problem in it before getting into this phase, we should always know that each problem has its own pros, cons and its solutions, so let's dive and get to know what awaits us there!

→ Different sectors of India — its pros, cons and solutions

① Education :- [Can we make a change here? — a bright future]

Education is one of the most important sectors of India and it seriously leaves a mark in the up-coming vision of India. Let's discuss about the pros of education here.

PROS OF EDUCATION :-

① Different schemes for the education of the students in the government sector is here. For Eg: Midday meal scheme, the involvement of Kapalandi Mitayi in 3 districts, the integrated child development programme and so on.

② Achievements of India [the real gems].

Many athletes, scholars and students are very good at what they are doing and are making us proud here and abroad. P.T usha being the the president

(Note: Graded Items may be published in **Schoolwiki**. So write neatly. Don't fold paper. Don't write overleaf)

Participant Code: 108

of (IOA) is a great example. Literally, education of India has given a lot of opportunities for us to thrive in this world but Indian education has its cons!

Cons of India Education - [a matter to be discussed].

① Online classes after the pandemic :- It is seriously affecting the children's education. even it provides the most quality education, it lacks somewhere, as we are not quite sure as it is different for every person.

② Becoming Doctors after attending online class :- This is one to be discussed gravely as our ^{life is} hands in the hands of the people who ~~are~~ became doctor after only attending the online classes, but the NEET exams and JEE is one ~~to~~ that is super helpful in India Education.

Item Code: 945

Participant Code: 108

③ Poor being overthrown :- [A right thing to do?]

Poor people doesn't have a chance for education, living in slums, a dark world, unhygienic places and not knowing there waits a bright world outside for them! -

Solution :- ~~Over~~ Create groups and bring forward those children, giving them education, food and shelter, they could be the finest gem in the upcoming world, as Aristotle said "Educating the mind without educating the heart is not educating at all"!

⊥ Health :- [Many more to progress]

The pandemic has literally shaken the foundation of the health sector in India right? We affected the most, death tolls increase, people running for oxygen whereas the "poor doesn't deserve oxygen, but the rich does". Seriously? ⊥ Is it right, for many government hospitals still lack basic services, unhygienic conditions, toilets, but the private hospitals of

(Note: Graded Items may be published in **Schoolwki**. So write neatly. Don't fold paper. Don't write overleaf)

Item Code:

Participant Code:

108

India surely does have full resources at higher rate. But it is to be noted that, India is growing in this sector bringing tremendous changes and our mission in the health sector should be exactly this. "According to a report it says, the omicron variant BF.1 doesn't create much infection in India. Yet the other report says: - ~~the children~~ a new wave is there in the upcoming January so we should be alert.

As a new vision, AI based diagnosis will be helpful for us: -

- ① AI based image scanning diagnosis
- ② digital health insurance
- ③ home lab testing
- ④ VOCAL Bio markers
- ⑤ CRISPR for deaf (a gene editing programme)

and many more to go should be brought in India.

III Economy: [Beware!]

According to a current report, ^{its status} IMF (International Monetary Fund) is slowly recovering after the pandemic, what is exactly the current state of our Economy?

① Russia-Ukraine War (Does it affect us?).

Yes, the current inflation and soaring energy prices are stemming from Russia's invasion of Ukraine and from the pandemic, businesses are still recovering.

② Unemployment: [a future in darkness?]

According to a census report, the unemployment rate of India is increasing whereas it is decreasing in the state of Kerala. A report states that 'most of the UK's working visa is for India's and it clearly shows that, India is getting quality education

Item Code: 945

Participant Code: 108

skill? "Kerala has most educated students but are jobless" — says Shashi Tharoor, what is its consequences:-?

① Leads to poverty, scarcity — We could see that according to the global Hunger Index, it states that India rank is 101th out of total 121 countries in the year 2021, whereas it ~~be~~ India ~~to~~ ranked 107th in the year 2022, it ^{is} really a disappointment right as it is connected to the education sector of India. ~~The~~ UAE's 1 Billion scheme is a great example for India.

② Rupee fall — It loses 10% of its value against dollar this year.

③ Environment — \$159 billion dollars income loss for India due to heat, India loss its income due to agriculture and crop loss).

Item Code: 945

Participant Code: 108

Like where are we heading to? We should know that all the above mentioned sectors of India clearly create a new vision for India as we are discussing it's problems and consequences right.

IV. ENVIRONMENT AND CLIMATE :- [good place brings good thoughts].

As everyone say's 'GO GREEN' should be our vision, our motto, sounds a bit cliché right but it is gravely important as ^{all other sectors} it clearly depend on this one. What is the current sibration of our environment. According to a ~~for~~ survey report, "Newdelhi" is the ~~polluted~~ one of the polluted city in the world, ~~→~~ CPCB [Central pollution control board ~~report~~ heavy pollution in delhi"] - These could be seen in every newspapers nowadays. Seriously I could say that we are way very much ~~to~~ not good in the sector of environment.

→ ~~The~~ cheetah brought from namibia for as india is extinct of cheetah's ! Is it one to be proud of? I don't think so. The best resolution for the American blizzard or even the pollution, be it noise and waste from the industry is all could be controlled if human acts and works as environment is one's own family.

* Solutions:-

* Generating power, manufacturing goods, production of food, plastics etc, consuming too much could be the reasons of the pollution we are suffering today → wind turbines, solar are better options. Elon musk's new starlink is also helpful for the people of India, the people in rural and isolated areas.

* COP-27 → Ab. sharm-Al-sheikh egypt is also one to be discussed about as people even from India attended the session to discuss about the global shield and it could turn out to be good for India!

(Note: Graded Items may be published in **Schoolwiki**. So write neatly. Don't fold paper. Don't write overleaf)

What could we learn from other countries?

"Berlin airport is getting converted into an eco city for 8 billion dollar project" → Instead of hearing this for my country, I heard: "Camera traps a snow leopard in Kashmir — a ray of hope" → Is it sensible? It seems as if those creatures can't be even exist in this world!...

✓ Agriculture :- [a basic need for the country?]

As farmers are withholding this country in a huge way, the protests of farmers, their family, needs aren't taken care of at some places.

'Genetically Modified Crops' — is the terms all people are afraid of — why? If our vision for India should be its development then :-

- ① Genetically modified crops should be introduced
- ② Pest resistant crops, and so on...

the good news is we have achieved some of them :-

Item Code: 945

Participant Code: 108

① Coconut gene bank at horticulture research centre started.

→ Spirulina farms are also in our country should be aware about.

VI ROBOTICS - TECHNOLOGY - [the evolving system?]

Who knows what is about to happen after a few decades, will robots evolve? but the thing is we India has achieved a lot and lot in space, technology etc.. Even for a new vision - it still means to be a better place, or better than other countries right? So what could be the new upcoming technologies and robotics as a mission for India?

- ① DNA based nanothermometers.
- ② Bio computers in living cells.
- ③ Bionic eyes — this could be major revolutionary invention, as it state would there be any kind of blind persons left?

(Note: Graded Items may be published in **Schoolwki**. So write neatly. Don't fold paper. Don't write overleaf)

Item Code: 945

Participant Code: 108

④ Greenfuneral :- Cremation could emit tons of CO_2 but this won't, it is done in mushroom suits too! fascinating right.

⑤ Invisible headphones, digital twins, cars in multi colour and so on.

These ~~are~~ ~~the~~ could be the stepping stones for this mission or some may have achieved yet, it could be a great milestone for ~~our~~ vision for India. It is stated that:- "kerala to setup 9000 robotic labs in 2000 schools" and a new software has been made to trace the PSC vacancies, without the department informing are also to be mentioned about.

VI Space :- [advancing alone]

Many upcoming projects for India and ISRO (Indian space research organisation) are great milestones for our new vision. Let dive into

(Note: Graded Items may be published in **Schoolwki**. So write neatly. Don't fold paper. Don't write overleaf)

Item Code: 945

Participant Code: 108

it :- (1) Vikram-S → the first private rocket of India.

(2) JAXA → (Japanese Aerospace Exploration Agency) is between India

and Japan and their space research.

(3) NISAR → A programme between ISRO and NASA.

(4) Gaganyaan-3 (first manned mission).

(5) Mangalyaan-2, Chandrayaan-3, Shukrayaan-1

is all worth to be mentioned about. The explorations they are doing could really make India a better country in the space sector.

As a matter of fact there are various sectors which behold India and here we mentioned the achievement, problems, the solution and so

on right? So, apart from this in order to be a better country as our next mission, there are

some problems that should be eradicated and

the ^{other} contribution of our Country.

Item Code: 945

Participant Code: 108

→ NATION'S GREEN HYDROGEN MISSION

[One country to be applauded about]

* Centre has allocated Rs 19,744 crores for green hydrogen mission as it could remove the usage of fossil fuel. This is a drastic change for India as it could free us from the problems that we are facing with our environment. A clean, green country perhaps?

PROBLEMS TO BE ERADICATED :- [a country with warmth of peace?]

↓ Politics :-

"Justice and peace' are like two sides a coin!
Is it seriously well served? India need to be changed as some of the sections of the society are still treated unfairly and poor sections are still denied of their rights and education.

Item Code: 945

Participant Code: 108

But a hopeful news is • The delhi lieutenant-Vinai Kumar Saxena proposed that 'non-consensual sex with wife ages (15-18) is considered as rape'— a news which girls and womans to be proud of but on the same side, ~~eat~~ cannabalisim is still practiced in this country which is can be a thing to be afraid of, In addibion to that, a report status that "4000 families including half lakh of people are said to go be removed from their homes without prior notice? It is still right, does any thing good comes for our vission and mission from this?.

→ DRUG ABUSE, SOCIAL MEDIA, GENDER INEQUALITY :— [a chair to Shackle?]

Nothing is to be explained about as our present scenario is going deeper into this webtraps.

India is heavily using this drugs not only but girls for what? → many reasons, peer pleasure, pressure from family, emotional imbalance, and so on. As "Drugs takes you to hell disguised as heaven".

The social media that we are addicted to, getting into that virtual life, not wanting to come out and face the problems. These all became more crucial after the pandemic. The term 'anhedonia' reduced ability to express pleasure, and the bandwidth anxiety of us between our twitter feeds, Instagram feeds are literally destroying us inside. Together with that, 'Gender Inequality' is not a cliché term that we used to learn from the textbook but an issue having a greater concern. No vision would be ever possible if women are still degraded and underestimated.

Last but not the least, we shouldn't forget what we are aiming at! We shouldn't be distracted by other problems or be idle. In this era where education for India is ~~not~~ from textbooks and not practical or skill based we should aim for the betterment of our country, its development, there is no need to be ashamed of taking other countries strategies as a great example. For Eg:- VAE-10 year plan in economy, china's plus-one strategy and so on. We have achieved a lot but still a lot of improvement is needed. Improving and creating miracles ~~are~~ in every sector should be our vision. Let love, warmth and peace should be filled here. As "life is a most wonderful fairy tale" by Hans Christian Anderson. "If you reach at the end of a rope, just tie a knot and hang on" → We should hope for a new vision for India = "India filled with rainbows and sunshines!" - . . .

(Note: Graded Items may be published in **Schoolwki**. So write neatly. Don't fold paper. Don't write overleaf)
