MESSAGE

I am sure that our school magazine will provide a glimpse into the diverse activities undertaken by our school and will also reflect the creativity, hopes and aspirations of our students. The basic responsibility of education system is that it identifies the talent of students and creates opportunities for its development. I am sure that our school is doing a yeomen service for the cause of education by quality education to the local community. I hope that our magazine will certainly be a source of motivation for our students to develop their creativity.

With warm wishes

HEADMASTER
SANTHOSHKUMAR P Z

EDITORIAL

“The desire to create is one of the deepest earnings of the human soul”.

Magazine is an artistic and linguistic approach of a crew emphasizing the creativity and imaginations of the end time generation with an innovative mind. The creative spirit, an elusive muse of good-and sometimes great -ideas. Yet it is more than an occasional insight. When the creative spirit stirs, it animates a styles of being: a lifetime filled with the desire to innovate, to explore new ways of doing things, to bring dreams of reality.

Life gives an opportunity to every individual to show up their talents. Signature comprises these things which we would like to introduce to you

I proudly present this work of blood and toil before the enthusiastic supporters.

Enjoy this piece of work.

Friendship

SHERY VARGHESE JOSHY

“Friendship with oneself is very important, because without it one cannot be a friend with anyone else in the world”.

-Eleanor Roosevelt

Friends can be seen everywhere in true friendship, there will be love there will be trust

and there will be purity. As there are friends There are devils To destroy good friendship

Friendship between two birds Is destroyed by a hunter Between the moon and stars

Is interrupted by the sun. But friendship between two Friends continue to glow Till life ends and

Can't be separated.

VOICES I HEARD

AKHINA ANNA BAIJU

First I heard a lullaby
When I jumped into the world
I heard voices, screechy
Then I was young
In leaps and bounds, I become
A girl of ten years
Then I started to reject some
And accepted some too.
Later I heard a voice, smooth yet through
Advising with care
Lead kindly lightTill your last breath

“The secret in
education
lies in
respecting
the student.”

-Ralph Waldo Emerson

SPECIAL FATHER'S

NIYA VARGHESE

Father of Computer - Charles Babbage

Father of Telephone - Alexander Graham Bell

Father of Nation - Mahatma Gandhi

Father of America - George Washington

Father of Telescope - Hans Lippershey

Father of Electrical battery - Alessandro Volta

Father of Indian Cinema - Dadasaheb Phalke

Father of Pakistan - Muhammad Ali Jinnah

Father of FM Radio - Edwin Armstrong

Father of Oil Painting - Jan Van Eyck

Education

A precious gem

Like water, precious to life,

Like oil, precious to nation

Like ornaments, precious to jewellers

Like degree, precious to graduate

Like wealth, precious to miser

Like health, precious to a physician

Like bravery, precious to warriors

Like courage, precious to boy

Like safety, precious to girl

Education is precious to all and forever.

SACHU REJI

Friends

ALAN SUDHI

Friendship is like crystal
Costly, rich and rare
Because once it is broken
It is hard to repair
Even if it is repaired
You will see the crack
If you break your friendship
You will never get it back
Friendship is not a flower
Which stands for an hour

Why is the Sky Blue?

ALAN C THOMAS

To know the answer to this question you must first understand that sunlight is made up of different colours, from red, orange and yellow to green and blue.

When sunlight falls on the sea, it is the colour blue that is reflected by the water most easily, giving the sea its blue colour. Near the coast, sea water takes on a yellow or brownish tinge. This is due to the mud that rivers discharge into the sea and the vast number of tiny plants and animals near the surface. When clouds hide the sun, the sea will look grey, weather conditions can also change the colour of the sea.

Life before computers

Satheesh.S

- Window was a square hole in a room
- Application was something written in paper
 - Mouse was an animal
 - Keyboard was piano
- File was an important office Material
- Hard Drive was a uncomfortable road trip
 - Cut was done with knife and
 - Paste was done with glue
 - Web was spiders home
 - Virus was flu.

- Apple and Blackberry were just fruits

A good friend is like a computer

I 'enter' ur life,

'Save' u in my heart,

'format' ur problems

'Shift' u 2 opportunities and never 'delete' u from my memo

26 Ways To Be Happy & Wise

BETHOVAN .P BINUMON

- A - Accept Each New Day As a gift
- B - Believe your Goodness and the
goodness of others
- C - Cheer others in their Success
- D - Do What you dream, Dream what you like
- E - Every moment is a gift of god
- F - Forgive others and yourself
- G - Give thanks to your graceful god
- H - Honesty is the Best Policy
- I - Intelligence takes you towards success.
- J - Join groups and work as a team.
- K - Kindness makes you a perfect one
- L - Look Before you leap
- M - Move forward during adversities
- N - Never lie
- O - O for a life of sensations rather than of Thoughts
- P - Practice makes one perfect
- Q - Quake in one's boot.
- R - Remember your past to make your future better
- S - Sow peace and reap happiness
- T - Time doesn't wait for anyone
- U - Understand your self
- V - spread fragrant among us
- W - Wish for the stars
- X - X'mas gives us happiness
- Y - You are unique, never forget it
- Z - 'Zany' makes us always safe

Phobia The Fear of Something

JAISON JOSEPH

Demophobia - Fear of crowds

Feminaphobia - Fear of women

Hydrophobia - Fear of water

Kesraunophobia -

Fear of lightening and thunder

Photophobia - Fear of light

Tolamophobia - Fear of rivers

Scolophobia - Fear of darkness

Thanatophobia - Fear of death

Thalassophobia - Fear of sea

Zoophobia - Fear of animals

Smile

Smile! It improves your face value, the fabulous thought makes us think about the immense

value of stretching our cheeks. But today, man in his hurried life, has no time to smile at others.

Our face is an index of our mind, and it reveals all the feelings and emotions hidden deep inside our mind. A charming smile adds glow to our face and grace to our personality.

To express anger it is said, we strain more nerves while to smile only a few nerves are put to work. So it is our duty to smile rather than lose our temper and waste all our energy. With a graceful smile we can do wonders! we may not know what the problems of others might be but a smile even without delivering a word reveals affection, appreciation and at times sympathy. Laughter is the best medicine. It is said so because it eases our tension and creates a pleasant feeling. With a flash of smile we spread exuberance all around. The most important benefit of smiling is that it helps us ease tension in personal and family relationships. SO SMILE... because it is the music of the SOUL!

ALAN THAMPI

ALEENA SAJ

It also makes the individual susceptible to high blood pressure, heart attack (myocardial infarction), stroke, increased anxiety, depression, suicidal tendencies, and reduced fertility. Chronic stress may also cause delayed wound healing, developmental deformities in children and young adults.

How to manage stress?

(A) **ADOPT A HEALTHY LIFESTYLE:** The best alternative to stressful sedentary lifestyle is a healthy lifestyle which encompasses.

- * Meditating or practicing yoga.
- * Exercising
- * Long walk with pets or friends
- * Avoiding habits like smoking and drinking
- * Moderating sugar and calorie intake
- * Avoiding high calorie diet

B) **SPEAK OUT:** Stressed individuals usually turn depressed.

It is better to vent out feelings and get help from a loved one, bottling up feelings will

only add up to more stress

(c) **REACH OUT:** Long working hours disconnect us socially, reaching out and reconnecting with friends through social gatherings not only helps de-stress but also helps in building a bond which is necessary for a stressed individual to bounce back strong.

D) **SEEK MEDICAL HELP:** One usually tends to ignore stress and accepts it as a part of one's life without trying to seek any help. Those suffering from chronic stress must seek an expert advice for a faster and safer recovery

Mathematics

Without Mathematics there is no life. Mathematics is the science that deals with numbers, quantity and form. We deal with money in our life. What is money? We count rupees. It is just arithmetic, a branch of mathematics. Mathematics is the study of the logical consequences of sets of axioms. Pure Mathematics, comprises those branches studied for their own sake or their relation to other branches. The most important of these are algebra, analysis and topology. There would be no railroads, air planes, TV, cinema, computers and thousands of other things that are part of our civilization without mathematics. When it was necessitated to tell how many animals the landlord owned, how many fruits his bag contained, the system of counting began. It was perhaps by the use of fingers in early days. In fact the word digit comes from the Latin word digitus which means finger. We have 10 fingers. So the general use of 10 in systems of numbers began. But it seems there were many number systems. The number system was invented by the Romans about 2000 years ago and was widely used in Europe until about the 16th century. However, the number system being used today was invented by the Hindus in India thousands of years ago and was brought to Europe by 900 by Arab traders.

The numbers in this system are nine. They are 1, 2, 3, 4, 5, 6, 7, 8, 9 to show how many and the zero. It is a decimal system built on the base 10. Zero is one of man's greatest inventions. the contribution of India to the world of mathematics is zero, "sometimes it is humourously said. But it is a fact that the Hindus who invented number system invented zero, also.

Actually, counting was the beginning of mathematics. Of course the art of counting took a long time to develop. Like counting the ideas of form and its measurement are equally important.

Classmates

Friendship is the hardest thing in the world to explain. It is not something you learn at school. But if you haven't learned the meaning of friendship, you really haven't learned anything. True friendship multiplies increases the good in life and divides its evils. Strive to have friends, for life without friends is like life on a desert or island... to find one real friend in a lifetime is good fortune; to keep him is a blessing.

A friend is one who knows you as you are, understands what you have seen, accepts what you have become and still, gently allows you to grow. There is a magnet in

your heart that will attract true friends. This magnet is unselfishness, thinking of others first; when you learn to live for others, they will live for you. Friends are part of the glue that holds life and faith together.

“A friend is a single soul dwelling in two bodies”. “Life has no blessing like a prudent friend”.

Friendship is always a sweet responsibility, never an opportunity”.

“Don’t walk in front of me, I may not follow Don’t walk behind me, I may not lead Just walk beside me and be my friend”. “A friend is someone who knows all about you and still

loves you”. Everyone of our is talented. One way or other we have some abilities. It is our duty to find them out. If we work hard to develop them, we will succeed in life. You might have seen sculptors. They make beautiful statues from marble pieces or stones. In beginning stones, appear boring and not attractive. However, after a lot of work they’re so attractive. It is true in

our life too. You can do many things in things in this Friendship Megha Mohan, Class XII C

world. We must understand that nobody is useless. It is the duty at each one of to develop the little talents. You know that human being is the best creation of God. Then how can he useless? So, we should do everything to develop talents.

SHEBIN LUKOSE

Medicine for future life

Education, if looked at beyond its conventional boundaries, form the very essence of all our actions. What we do is what we know and have learned, either through instructions or through observations and assimilation. When we are not making an effort to learn,

our mind is always processing new information or trying to analyze the similarities as well as the tiny nuances within the context which makes the topic stand out or seem different. If that is the case then the mind definitely holds the potential to learn more.

However,

it is we who stop ourselves from expanding the horizons of our knowledge with self doubt or other social, emotional, or economic constraints. While most feel that education is a necessity, they tend to use it as a tool for reaching a specific target or personal mark, after which there is no further need to seek greater education. Nonetheless, the importance

of education in society is indispensable and cohering, which is why society and knowledge cannot be ever separated into two distinct entities. Let us find out

more about the role of education in society. Education is self empowerment. Receiving a good education helps empower you, thus making you strong

enough to look after yourself in any given situation. It keeps you aware of your given surroundings as well as the rules and regulations of the society you're living in. It's only through knowledge that you will be able to question authority for its negligence. It's only when a citizen is aware of the policies of its government that he will be able to support or protest the change. As a rule, people can bring about development only when they know where improvement is necessary for the greater good of mankind. Education helps you understand yourself better, it helps you realize your potential and qualities as a human being. It helps you to tap into latent talent, so that you may be able to sharpen your skills.

Teacher is absent

EDWIN SHAJAN

The Fight Against **Terrorism**

the need of the Hour
They think that their
own viewpoint or
stand is the only right
view point or stand
and that they have the
right to convert other
people to their view
point by force.

RICKSON SABU

Loneliness

God is graceful and so we are blessed
By all the gifts of nature
Life is to enjoy, spreading bliss all around,
Exploring the treasures of life.
But alas, loneliness creeps in,
When and how, no one knows
Life is shattered and shrinking
And we feel lonely and very lonely.
Learning to overcome the hurdles of life,
Striding along with ups and downs,
Facing all hassles with a gentle smile,
Exploring the treasures of life.
At what time or how it comes,
No one can predict, but it is sure to come
Life is shattered and shrinking
And we feel lonely and very lonely.

THARA MERIN BABY

A WONDERFUL MOTHER

God made a wonderful mother,
A mother who never grows old
He made her smile of the sunshine,
And he moulded her heart of pure gold
In her eyes, he placed bright shining stars
In her checks, fair roses you see
God made that wonderful mother,
And he gave that dear to me...

SONY VARGHESE
