## About the 'Sweet English'...

English is a foreign language and is considered as a West Germanic language. English is originated in England. Around 600 to 700 million people speak this language all over the world.

English is the Official language of 67 countries, United Nations, European Union and many other international organizations and is the language of science, computer, IT, media, tourism, internet, websites etc.

Considering the present scenario we are launching the **SWEET ENGLISH** Program to up bring students in English learning process.

This **Sweet English** program has been introduced on the finding that many our students in primary standards are facing some problems in English language. As rural typical village hilly area most of the students don't get much help from their homes and society. Use of English is limited only in the class rooms. The students don't get ample situations to listen to this language. The routine class room business is carried out only in the mother tongue. Only in the English period that is 40 minutes out of 24 hours they get a partial English experience.

Naturally, from the beginning itself children abstain from this language. In this situation in our SRG meeting we decided to do something to change the situation. We are fully aware that create 'an English culture is a Himalayan task. Any how we hope that a few steps in this direction will take them forward a lot.

At first we conducted a base level test to all students from standard 5- to 7. For this we prepared our own work sheets. For standard seven we used the REAP handbook issued by Palakkad SSA.

We are proudly introducing the activities and worksheets of our **Sweet English** program to whole students and Teachers of the school.
