## HOW TO BECOME A GOOD STUDENT

A good student must have a huge desire and passion to learn and explore something new every thing would indeed seem very easy and enjoyable if we think of school as a place for discovering oneself as a person not as a frustrating place where we are always pressurized and know how to develop self discipline. For instance he or she must always come to class and assignments and projects on time.

Developing a good time management and self discipline is in fact, a part of professional development for students and directly related to their success. In addition, a good student must be active and be polite. A good student would actively participate in the class discussions and would not hesitate to ask questions to his or her teachers. In addition a good student would also always listen to the teachers are teaching or explaining something. Other aspects of a good student are honesty and consistency.

A good student should be academically honest in all aspects of their school work.

## First day of school

The first day of school  
can be hard for mom and dad.  
part of you feels excited.  
The other part feels sad.

For many years you have held their hand  
and have been their loving guide.  
Now you know the time has come

To leave them by my side  
But it is only for a little while  
As your child will learn and grow

And at the end of everyday  
they will share with you all they know,  
So as you walk away  
Don't worry any more  
I'll take care of all those precious gifts  
when you leave them at my door.

## Rain

Here comes the rain!  
After the dust and heat,  
To make every soul glad,  
To enrich the land,  
To fill the water sources.  
How exciting to watch!  
The rain – drenched streets,  
The sprawling greenery.  
But sometimes a wild fall;  
Ruining the land,  
Taking lives and casting doom.  
Oh rain! Keep falling;  
The life-giving nerve of the earth!  
But go away now,  
Come again next season.

## **Importance of Newspaper**

The main conveyor of news is newspaper. Though there are many other sources of news like magazines and books in print media, radio and television channels and internet connection in electronic media, words of mouth and telephone and wireless communication etc. Newspapers are very important in many ways

They give us lots of information about various matters at various levels that are not available anywhere. Through magazine and books also give lots of information, the scope of the news is limited to a few selected topics. Television and internet connection will provide news faster than the newspaper, it cannot have width, breadth and depth of the newspapers and do not provide the comfort of the repeated references at our leisure

Advertisements in newspaper are also very

സർഗ്ഗതരംഗിണി

information and give lots of information about the world around us and recent trends a part from being very entertaining. The editorials and the articles in the editorial page of the newspaper are always very analytical and give insight to the news and their background. Reading newspaper is incomplete sans glance to the editorials and the articles. People of all profession need newspapers. Engineers, doctors, scientists, professors and other professionals need them to know the day to day developments in their respective fields.

## FRIEND MY FRIEND

I found a friend in my lord  
He is like the roses in garden  
And Lilly of the valley  
He is everything to me,  
He is the fairest of ten thousand To my  
soul  
He give me his hand in trouble  
He is like the bright and morning star  
In the light of the world  
When I stop into darkness  
Open the eyes let me see  
Beauty you made my heart adore you  
Hope of my life spend with you,  
Here I am, to worship you  
Here I am, to say that  
You are my god  
who helps me in any situation  
You strengthen me when I am weak  
You brighten my eyes in darkness  
You raise me up  
My heavenly Friend thank you for all.

## **WOMEN'S EDUCATION**

It is selfishness that makes men deny the benefits of education to women.

Men say that , if women learn to read they will read sensational books and neglect their household works. This change is unjust. Women will do their work better if they can refresh their mind by reading books moreover, by reading modern books, on health, a woman can take good care of the health of her family but if she is illiterate, she may listen to quacks and ruin their health.

A wife is not just a cook., she is to be her husband's companion. An illiterate woman cannot be a good companion to her educated husband. Only an educated mother can give proper training to her children during their early years. Improving girl's educational levels has been demonstrated to have clear impacts on the health and economic future of young women which in turn improves the prospects of their entire community. The infant mortality rate of babies whose mother have received primary education is lower than that of children whose mothers are illiterate. Improving female education and thus the earning potential of women improves the standard of living for their own children as women invest more of their income in their families than men do. Education of women is therefore quite necessary.

## TO MY CHILD

Thoughts become dark and deep, feelings fade as if they didn't  
When life starts, we don't know how to live and when we start to live,  
The life ends, left behind, without an utterance...  
It goes on and on.....

The lives around us seems to be ours  
some one who have life of their own  
The same it will be with you too, my dear child  
will you be able to make a change?

Even if I may not be there with you,  
But still my soul will be with you my sweet heart  
I'll be there whenever or wherever you want to be  
Won't leave you alone, My child

Be brave and face the world with all the might  
Don't be scared for I am with you, my child....I am with you, forever..

## **THE WOLF WHO WAS FOOLED BY FLATTER**

There was a large fleet of sheep grazing on a field. A Wolf stealthily stole a lamp. The lamp tried hard to get away, but it could not. As the wolf was about to kill the lamp an idea struck in the lamps mind. The lamp pleased

“Oh wolf i know that i am going to die now. Will you be kind enough to fulfill my last wish? The lamp replied “I am fond of music, Before I die I

wish to hear you play the flute”. The wolf agreed to it and played the flute. When the wolf stopped the lamb said. Oh! What a beautiful music, will you play a bit louder please? You play better than my shepherd “The wolf was pleased by the flattery and started to play louder. In the meantime, the

## Neem Tree

The neem tree is often referred to as the ‘village pharmacy’. The tree is described in detail in ancient Sanskrit texts. The traditional uses of neem are many and varied in India. When a child has fever chickenpox, neem leaves are kept on the bed. For skin. When woolen cloths are put away, neem leaves are put between them to keep away moths.

സർഗ്ഗതരംഗിണി

It is also used as a natural antiseptic toothbrush. People break the twigs and peel off the bark and the chew it into a soft brush at one end, which they then run around the gums and teeth. Finally, they split the twig in two and use the flat hard surface to scrape their tongue. It is said that the temperature under a neem tree is always two or three degrees cooler than in any other shade.

## MANAGEMENT OF NATURAL RESOURCES

Natural resource management refers to the management of natural resources like land, water, soil forest etc. It affects the quality of life for both the present

And future generation. It deals the way how human and natural resource interact. Resources should be used in a planned way.

Water conservation, sustainable development etc. Can lead to management of resources.

Sustainable development means development without harming the environment i.e mining, exploitation of resource etc. Should be done judiciously so that the resources can be used by the future generation. Resources management can lead to ecological balance. Ecological imbalance can lead to many environment problems like flood, earthquake etc. These are hazardous to human life.

Exploitation of resource by the human is the factor that lead to ecological imbalance. Natural resource management is a factor that can lead to ecological balance, so everyone should use the resources judiciously and adopt a new way of life.
