

The Vision for a New India

In this third millennium, we are confronted with many contrasting possibilities. Day by day our economy is rapidly changing to attain peaks of ~~new~~ new ventures.

The scientific and technological innovations keep inspiring us. The time has changed where, people found it difficult to manage their daily life.

Because, now by one click we could possibly get anything. The largest democratic country, India is never lagging behind to achieve its golden dreams of development. The future of developing India is in the hands of its people, especially in her youth resource. We, the children are the milestone of the foundation of our young India.

The vision for a new India is not distant from our minds. An inborn urge to make our motherland a beautiful civilized country lies within each and everyone. But the ways in which we could shape a New India should be discussed. It is the primary need of the hour.

Without education, we cannot achieving anything. Education is the foundation on which changes are made. Even in this twenty first century, the rate of illiteracy in our country is not diminished. In Northern states and north-western states, child labour is haunting the young aspirants. They are not getting proper education. They are deprived of the chances to raise and fly.

Learning new horizons makes, one's vision transparent. It helps him to achieve heights of success. The development of our country lies in the hands of today's

(Note: Graded Items may be published in **Schoolwki**. So write neatly. Don't fold paper. Don't write overleaf)

Item Code: 945

Participant Code: 103

young minds. And its therefore mandatory that they get the proper chances to shine to upbring our culture and to make India proud by their enlightened minds.

A new India will never be prosperous, if its people is in dilemma. It is very evident that people of India is deprived of food, proper water, shelter.

These basic things are mandatory to maintain our lives. Metropolitan cities and technological parks keep developing in the course of time. But the adverse condition of slums in our country overweighs all these developments.

India, the largest democratic country is not only the motherland of the wealthier section of society. Rather the poor, minor sections of society are also a part of her. So we can never imagine a prosperous country without right

(Note: Graded Items may be published in **Schoolwki**. So write neatly. Don't fold paper. Don't write overleaf)

Item Code: 945

Participant Code: 103

facilities being offered to everyone of India.

It is the responsibility of government to take care of the deprived ones.

Proper sanitation facilities, housing and other facilities should be offered to them.

Because at the end of India, it is the people of India who make her rich.

We are all aware of the various campaigns and riots that were hosted in our country by our ancient great leaders against many social evils. But, today we might be doubtful to be on thinking the sustainability of those changes.

Social evils like dowry system, sati, inequality, religious conflicts etc are still prevailing in our country.

A strong and bold action against these aspects should be taken to vanish these evils. Or else the dark phase of inequality and discrimination.

(Note: Graded Items may be published in **Schoolwki**. So write neatly. Don't fold paper. Don't write overleaf)

Item Code: 945

Participant Code: 103

will haunt us. Gender inequality is vanished to an extent but still, its foul aroma is circulating our citizens.

Women are faced by a lot of barriers. She is not allowed to do anything on her accordance. Still, she is considered as an inferior one who is not capable to do anything on her own. She is only supposed to stay locked in the four walls of her house. This suppression is killing mentally a large percent of our women population. For a new India, no more gender inequalities should sustain.

Another region to focus for a new India is stopping her children to leave her for the purpose of gaining knowledge. A trend is seen in abroad education in the recent years. In 2019, the students emigrated were one lakh. By 2021

(Note: Graded Items may be published in **Schoolwiki**. So write neatly. Don't fold paper. Don't write overleaf)

Item Code: 945

Participant Code: 103

it is seen that, it went upto around three lakhs. An increase of by 40 percent was seen again in 2022. So this clearly point out to the fact that, the young resources of India are leaving her.

Manyatimes they are looking for top universities for their education. Here, a question is raised about the standard of educational facilities in India. We are having many central universities and reputed Institutions. But only few among them managed to secure a place in the World Ranking. So our intellectual bright students are leaving our country.

Here, we are going to get deprived of the various efficient ideas that would be offered to us, if those young minds never intended to leave our country. This pose for a need to

(Note: Graded Items may be published in **Schoolwki**. So write neatly. Don't fold paper. Don't write overleaf)

Item Code: 945

Participant Code: 103

evise world class reputed Institutions for our students in our country itself that would bring new innovative ideas to our technical and scientific field.

But on the other hand, the people leaving our country for education and job opportunities are bringing foreign money that could flourish our economy. So it should be done accordingly that, efficient students should get an intense desire to ~~to~~ live in their country.

Next, we could possibly think of a new India, where her children are enriched with moral values. Because, it doesn't make any sense if ~~we~~ our character is lost even though we are wealthy. There is a famous saying that, "If money is lost, nothing is lost; If health is lost, something is lost; And if character is lost, everything is lost."

(Note: Graded Items may be published in **Schoolwki**. So write neatly. Don't fold paper. Don't write overleaf)

Item Code: 945

Participant Code: 103

A harmonious life can only be lived if the people are ready to accept others. One's character can be shaped from his family, friends, relatives. Even the people around him influence one's character. So we should be aware and keen that we are never a negative cause for someone who is trying to develop.

If a person changes, a family is changed. If a family changes, a society is changed and thus a nation is changed. So we are the foundation. And we should not hesitate to accept this fact. Thus a harmonious life can be achieved in our country.

Another great challenge faced by today's citizen is the vast unemployment. A new India is a dream for all of us, but she would never be complete, if her people are suffering.

(Note: Graded Items may be published in **Schoolwki**. So write neatly. Don't fold paper. Don't write overleaf)

Item Code: 945

Participant Code: 103

under the aoe of unemployment. Employment to everyone in our country shapes a new India. For this proper and enough opportunities should be provided. Our young minds should be dare enough to take up the risks to achieve heights. We should be able to inject a sense of determination to our younger generations.

Many people are facing depression due to unemployment. The burden of their family on their heads are haunting them. And this has even lead to conditions like suicide.

Another important sector where our new India get should get glorified is the primary sector. Primary sector of our economy is the agriculture and related activities, were we are provided by outputs like food raw materials of food and clothing etc. which are of great

(Note: Graded Items may be published in **Schoolwki**. So write neatly. Don't fold paper. Don't write overleaf)

Item Code: 945

Participant Code: 103

importance. But today we could see that the farmers of our country are deprived of their rights. Their all hardwork many a times gets in vain. Because the products they are producing are not getting enough income. The price of vegetables like potato, carrot, ginger, tomato etc are very low. This is one of the major problems faced by our country. And we have heard of many suicide cases of farmers out of this depression.

Hence, a new India should treat her working class people in the most appropriate way and should not feel abandoned.

Our New India, should be free of pollutants. As the industries are rapidly rising, the pollution is day by day increasing. Air pollution, water pollution, soil pollution are different types

(Note: Graded Items may be published in **Schoolwki**. So write neatly. Don't fold paper. Don't write overleaf)

Item Code: 945

Participant Code: 103

of pollution which our country is facing. The large industrial wastes which are dumped into our water resource is haunting our aquatic life. Many species are at the verge of extinction due to this act.

The chlorofluorocarbons that are released from the refrigerations and harmful gases released by our vehicles are affecting our atmosphere and ozone layer. The air Quality Index of big cities are very low. The effect of this pollutant is seen in the monument, Taj Mahal. Taj Mahal is losing its white colour due to the polluted surroundings. Even this polluted air is not good for us to breath.

Various types of plastic wastes are making heaps in our green environment. Animals are getting choked by these. This will affect the water penetration level.

(Note: Graded Items may be published in **Schoolwki**. So write neatly. Don't fold paper. Don't write overleaf)

Item Code: 945

Participant Code: 103

If we think of the various problems that are being made due to these pollutants, it would be a never ending list.

In this situation, our life is being threatened. We are not even able to breathe fresh air. And if this condition continues, there might come a situation where we shall ~~go~~ should buy oxygen to sustain life. And thus a new India, would be a place where these various pollutants shall be kept away.

For getting fresh air, more and more plants should be planted. On our way to a new prosperous India, we can make a self pledge to never haunt your beautiful mother for your selfish needs.

Because what we always intend is sustainability. The place ^{where} we are living is not only meant for us. But for our

(Note: Graded Items may be published in Schoolwki. So write neatly. Don't fold paper. Don't write overleaf)

Item Code: 945

Participant Code: 103

younger generations too.

If our earth is feeling
free out of the pollutants, then she will
bestow us with prosperity.

Green revolution and white
revolution were a cornerstone for development.
Such revolutions in many fields are needed
to bring up the developmental phase of our
country.

The new India, should be
a place where people live harmoniously
without discrimination and judgement.
The prevailing disparities based on
colour discrimination should be vanished.
No colour is worthier than the
other. For a better India, the bitter thought
of people should be changed.

In this growing technologi-
cal era, the influence of media and its
various branches is seen evidently. Now, we

(Note: Graded Items may be published in Schoolwiki. So write neatly. Don't fold paper. Don't write overleaf)

Item Code: 945

Participant Code: 103

could perform anything just by a click. Even in the pandemic era of COVID-19, our lives were not completely locked since we had great technological roots. We had chances for online classes and now we are having online businesses and even work from home.

All this made possible by the advent of technology and media. Now rapidly growing technology is reaching out to new niches and making our lives much more easier in every aspects. This great influence of technology on us is very beneficial. It saves a lot of time. And now smart work is paid off than hard work.

But manyatimes, it is seen as time consumer. So we should be aware enough to control ourselves from these regions. We should be able to use it

(Note: Graded Items may be published in **Schoolwiki**. So write neatly. Don't fold paper. Don't write overleaf)

Item Code: 945

Participant Code: 103

for achieving beneficial outputs. Or else the wrong usage can affect our lives.

The improved technological and scientific innovations have helped our country to reach this level of achievements and developments. So, of course we can think of our new India where the technological experiments and developments are far away from our local way of thinking. It is the time of artificial intelligence. It various branches points out to a model of three levels.

First level, where everything is in accordance with what is programmed. Second level, where the actions are on the level of human capacities and thinking. And the third level, where intelligence is programmed beyond the capacities of man.

All these inventions leads to the technical development of our country. So a

(Note: Graded Items may be published in Schoolwki. So write neatly. Don't fold paper. Don't write overleaf)

Item Code: 945

Participant Code: 103

new India of our dreams will be a country where the technological resources are rich.

And it's mandatory that the health of the people is ideal. In the earlier generations, there were many diseases, but many of them are vanished in our era due to the precautions our country and government is taking in providing proper vaccines. But unfortunately, we are witnessing negative impact in health of our citizens due to the prevailing uncontrolled use of drugs.

Drug abuse is not only just leading to health problems. It is mentally and physically affecting the individual. Whatever, the development is, people are the greatest resource of every country. So this should be regulated for achieving our dream India.

(Note: Graded Items may be published in **Schoolwiki**. So write neatly. Don't fold paper. Don't write overleaf)

Item Code: 945

Participant Code: 103

A new India of our dreams can only be achieved if our people are physically, mentally, emotionally and socially treated well. All other developments are secondary. ~~The~~^{The} main goal of a new India is her people's wellness.

And the healthier citizens will enhance the country economically and politically, which shall gradually lead the country into a developed one. While India is on her developing phase, the above mentioned qualities should be attained by her, to make her developed. And then we will witness a "new India" glorified with colourful wings and we can be proud of the achievements our country have gained in technological, scientific and humanitarian regions.

A new India is not the only vision of me or you. Rather the whole country is keen to witness a "new India."

(Note: Graded Items may be published in **Schoolwiki**. So write neatly. Don't fold paper. Don't write overleaf)

103

And for that we all should hold our hands together to make our place a better one. Sustainability should be our concept. Then only we could imagine of a never ending harmony in our country. And we should never forget one thing: "Even if it is the era of machines and technology, moral values should never be vanished from our minds" Because it is not the wealth that counts at last, but the character.

If we are ready to change, the whole country will. So let us be the foundation on which a 'NEW INDIA' is made.
