## BUILDING AN INNOVATIVE KERALA

### INTRODUCTION:

In this Modern era, we have witnessed quite lot of life changing events. Heartfelt Gratefulness to say that we are a true witness to these events. We have seen the growth of Kerala from economically, socially and culturally challenged into a first class infrastructure which has even the strength to rebuild a nation.

We went through good times and bad times. As a student can proudly say that, these events has changed my perspective of my native place. It's truly astonishing to see that, my native place has outlived the challenges thrown by the universe.

Nevertheless, these days it's having quite a trouble in keeping peace. Wonder what changed? but a quite had changed. I would be happy to speak about my perspective on this matter and how we, the students can bring this perspective into reality. So let us dive deep into my view.

## Man's Greed : A catalyst in Destruction

As im preaching about the new innovative Kerala of my mind, it will be a shame if i left out environment. The most deadly matter of today. Kerala, is known as God's own country for its lush green and serene scenery and ~~Gilau~~ like beaches. We are known for our hills, forests and Greenish landscapes.

But now we are witnessing the downfall of those breathtaking places. Who is the rootcause of all that? lately we witnessed the horritic tragedy in Wayanad a tremendous landslide that took over 400 lives, leaving a ground full of debris and a sorrow life of those who lived there. Who and why it happend? When these question's ~~where~~ were raised, not only now but <sup>these</sup> have <sup>these</sup> been raised for over a long time. We know its a meaningless question

Since we know what triggered it That is, let me tell you crystal clear "Human Greed"

We have been learning about the importance of environments, ecosystem, trees and many more for over the years and the need to protect it. Still we haven't stopped or even tried to stop it. Why? Money. Money and power are the biggest corruptors and no man can escape from its influence, they say

I wish for a Kerala in which we all can live without having the need to worry about Natural hazards or Global warming. I as a student wish to build a Kerala with its people aware of the need and importance to protect the magical breathtaking landscape and finite resources. For that we shall spread awareness on these matters to people and encourage them to live by the principle of protecting the environment and not destroying it and to start sustainable agriculture so that we can live healthily and peacefully. This is the first step I will do in building a new Kerala.

Education: The cornerstone of a harmonious Society

Education is the pillar of a harmonious and peaceful Society. Education helps us in realising what's good or bad and what's right or wrong for us and for our Society. Education brings dignity and discipline into our life leaving a well disciplined knowledgeable Community. Some may enquire what's in those textbooks that we read and why it's so important to read it because it shapes our way of thinking from a narrow one to a broad minded. It helps us in critical thinking and in problem solving ability. It's a manual on how to live life without regrets.

For a nation to acquire true wealth we shall all be literate and well-educated. Our Nation's future gift is us, the students. So in order to create a new Kerala we shall all be well-educated and well away of the ruckus that will happen if we

Participant Code: 416

arent educated. because then only we can be a part in the economic source for our state.

Surprising to know that in our state, in some rural places there are still some groups who is still hesitant to be educated. we shall be a good model and inspire them into the wide world of Education and help them in acquiring a better lifestyle. for this as a student we have to spread the message of education and spread the need to dream, <sup>to</sup> dream for a better life in a better society.

### Traditional and cultural progress

You all have perhaps heard of Kerala Kalolsav. It is Asia's most biggest festival held in school-level. It is a vibrant platform in which students of our state can express and perform their artistic talents in a disciplined way. this program was initially started in 1956-57 known as Yuvaganolsav

by Dr Venkiteswaran in Ernakulam with a merely 200 participants. but now it has evolved to an extravagant festival with about 15,000 participants in almost 250 competitions across 25 platforms. This is a result of the Kerala government in their perseverance of the upholding of our cultural and traditional lifestyle proudly. These festivals now play a pivotal role in every student who dream of living their life in a stream of artistic culture. my point of view is that these festivals shall be in the stream for a long time. It shall never stop and as time goes on, i hope it can add more traditional artforms and bring light to our diverse culture and luxury tradition.

I as a student encourage each and every student in Kerala to take part in it. Whether you are shy, insecure or embarrassed of yourself be a part in it and experience this heaven of freedom.

to showcase our talent and inspire others too in realizing their true potential and to live up to it without having a tiny bit of regret.

### Breaking Gender Stereotypes

Even though we speak about urbanization, progress of our state a majority of us are still bound to live in an orthodox society where we aren't supposed to break gender stereotypes, supposed to obey a patriarchal law. In our society some specific things are set aside for women and men too. a set of stupid and unrealistic rules that we are supposed to follow. These are made by some radical groups who still can't believe that it is not Indus civilization or kingship but democracy and the Modern era. The modern era which is supposed to be a free world for hope and dream is now getting chained up by some undereducated people.

Therefore in my new Kerala that I dream of

building will be free from stereotypes. One that will uplift the true meaning of democracy. When women and men will live like butterflies taking part in the progress of our nation.

### Conclusion

To sum it up, as a student and the future of our state I wish to build an innovative Kerala that will show the true colours of education and its result and the cultural and traditional diversity and its luxury shall be visible for each person that lives here. I wish to build a Kerala that shall be free from any worry on natural hazards for that as a student what we can do is protect our environment and encourage others to do so. Proudly showcase our cultural diversity and inspire others to do so. Be a part of the educated folks and give services for our state and call others to

Participant Code: 416

do so. live your life in the way you expect to build new Kerala and let others learn from your life. We shall promote the message of non-violence and the greatness of truth. We shall spread the theme of a secular and democratic state. We shall engage in service related clubs and their programmes.

Let's give our best and upgrade our State a bit more. Jai hind.
