## Modern Technological Development and Human Values

---

This is the age of Science and Technology. Today, our country has become modern by the vast technological development. The advancement in technology plays an important role in the social and economic growth of a country.

Human beings are giving much importance to the modern technologies today. There are so many merits for these technologies. The main merit of the growth of technology is the 'saving of time'. We can save more time by these technologies, and all these techniques can make the uses of man more fast.

Now a days, "Our world is under the hands of a mouse button". In earlier days that might be a dream.

to us. But in this century it has become true. We all are now covered with a 'magical Net' namely Internet. This is one of the most important inventions happened by the advancement of Modern Technologies. Internet became a very useful thing for man.

Internet can bring all of us under one roof. We can communicate to anyone, in any other continents with the help of Internet. Human beings can attain reference on any topics without referring books with the help of Internet.

The invention of television and computer also plays a vital role in the day to day life of human beings. By the invention of these, we can know and see about anything happening around us live.

The Modern Technological development in schools had become very helpful to the students. They can study everything by seeing with the help of Projectors. Thus class rooms are also becoming high tech by using the modern Technological Developments.

In recent times, we can see that the brain of human beings is working very fastly. In the field of medical science there was a huge development. It became helpful to the treatment of people for ailments like, Cancer, kidney problems e.t.c. The organs of human beings are also transplanting. This can be clarified as a very big example for the growth of Modern Technologies.

The Inventions of Many household items has helped the housewives to control the hardness of their jobs in the kitchen.

Our country can become well developed with the help of these modern technologies and Developments.

But Our country is one with rich heritage and culture. and we, the Indians are not conscious about it. We are eager to follow the foreign culture. Development is necessary for any country. But some developments are imitations are that as foreign countries.

There are so many merits for the development of modern technologies and they are very very vast. But the human beings are losing some of their values by this types of development. It is not good for our country and it will affect our country's culture and heritage on a large scale. We have to be eager about our values and if the human beings are losing it, they cannot become successful.

Merits and Demerits can be seen in any type of Development. In this Modern developments also we can see Demerits on a medium scale.

In the development of Internet, there more ~~demerits~~ merits we can see is that. But there are also demerits for it. The increasing Cyber Crimes is one of the important and key Demerits. The students and teenagers are going on wrong path through the internet by seeing bad sites, dirty pictures etc.

And there are many sites, that can kill even human beings. The game of 'Blue Whale' and the Instagram sites 'Sycor Chikkan' are examples. They picked the lives of many teenagers.

These types of sites can lead even the ~~best~~ good students or children in a wrong way. Human beings are becoming cruel towards each

Other by blackmailing one, killing  
e.t.c through these.

The invention of the monster Plastic  
'that sows seeds of death and has  
no death' is a result of these develop-  
ments. It has uses also. But it  
is very harmful to our environment  
and it can pollute it. Plastics are  
also unhealthy things can cause  
cancer and other deadly diseases.

The invention of nuclear bombs  
can be termed as one of the key de-  
merits of the development of modern  
science and technology. It picked out  
the lives of lakhs of people during  
the incident happened in Hiroshima  
and Nagasaki.

When we compare the merits  
and demerits of modern technological

Developments, Merits weigh more than Demerits.

The only responsibility in the making of demerits is the bad thoughts and techniques of man and they are the only persons responsible for this. Why are they becoming so much?

The advancement in Modern Technological field can make a country and its people well equipped and it will help them to lead an advanced life.

So, we all have to utilize these developments only in a good way for us and our future generations. Development is very essential to lead a 'Successful life'. So, make use of the merits of technologies without losing

The human Values, Heritage and Culture.

So, we have to join our hands.....  
to eradicate the demerits of modern technol  
and to work hard,..... and together.....  
For the growth of modern technologies,  
For the growth of our world and our  
life, by concerning our values).....
