

One of the unforgettable moments in my life, The Little Kites' District Camp held at GITSS Nadakavu. To be honest, I have never been in a Residential Camp before. So I had a lot of expectations about the 2 day Camp. Some of them were. strict Trainers, Average food, No any entertainments, etc... but the camp turned out beyond my expectations. it was fantastic...! The teachers was very friendly and they cleared every doubts of each person and also they had a very high skill in 3d animation. Now let me talk about the food, it was delicious. every food was prepared very hygienically. The main highlight of the camp was the Lab practical session. As I said it also turned out to beyond my expectations, The whole classroom was with the same aim (to study blender) and to those teachers for helping and clearing each and every step. Students also

helped. very friendly Ooooh!, There are no words to express my feeling. The residence was at. The program which surprised was the night program (the entertainment) it was very joy full all of them were in a party mood. The Trainer Mentors also danced with us and enjoyed as well. and at last The Trainers surprised us with big fireworks it was too good too... and At last the residence, it was quite good expect that horrible mosquitoes.....

Although the camp was outstanding....!
