DOES UNITY DIVERSITY UNITE OR DIVIDES? ^{previous}

"Unity in diversity", this saying

is one of the most heard among us. It has also become

The most hotly debated topic which divides opinion.

The specific terms 'unity' and 'diversity' have been

subject to controversy ubiquitously. As Albert Einstein

said "If everyone is thinking alike, then no one is

actually thinking". It is true that the topic can divide

opinion due to different levels of thinking of mankind.

The actual question rises here when we think deep

into the topic. Does unity ~~divi~~ diversity unite or divide?

If we excogitate, we may or

may not find the answer. Diversity is something that

makes us different from each other. It can be in

personality, behaviour, character, looks, appearance

or whatever it may be. Diversity The term 'diversity'

not only applies to human kind, but also to our

country. "India, the land of diversity". This is what

makes our ~~our~~ country different from others. Different

kinds of plains, plateaus, mountains and rivers.

Have you ever thought about a world where all the people had no difference? They were all the same kind. From my perspective, I would say that it would of no use, we grow through Diversity. That is what makes us move forward. In India, where there are a lot of diversities, we can^{not} never negotiate that India is one of the largest democracy in the world. The people in India works in unity ~~with a~~ by having a lot of diversity by its side. Despite of the religion, caste, creed, sex or any colour they lend ~~to~~ a helping hands to the one in needs. From this point of view, our country can be set as the best example for the saying "unity in Diversity". But, as the coin has ~~a~~ two sides, the situation also has got two sides.

Does diversity divide? Yes, if we entangle the tangled thoughts, we can see that Diversity can make problems among the people. The number of people who sacrificed their life lives for ours are innumerable. why do they have to?

There ~~eat~~ is no space for such question here. In a world, where changes are happening ^{continuously,} and power is ~~and~~ influencing the mass. Freedom is something that is not given any value nowadays. People makes it look like a boen doggle. "Freedom is not the right to do ~~whatsoever~~ we want to, it is the right to do what we ought to". Just because we are something that they dont like or we are diversified, it doesn't mean they have the right attack us in anyway. The news of being killed due to religious issues and caste issues are very common. It is no surprise that if a person gets killed right in front of you. The imperturbability of the youth is a main reason behind this. This is not the time to elude, we should elucidate.

Diversity has also taught us to divide. on the basis of many unwanted things such as caste, creed, religion and ~~they are these are~~ ~~endless topics~~ many more. From the old times, itself this evil practice has been brought along. The caste

system, which prioritized the Brahmins and kshatriyas, then the vaishyas and shudras. This particular system made divisions among people. Along with this consequently, many other evil practices came along. untouchability, sati, child marriage and more. The backbone of the problem is not diversity, it is the mindset of people. How we take a situation and handle them is what matters. we must not be afraid to go against anything. The famous Christopher Columbus once said that "If you want to cross the sea, one must have the courage to lose the sight of the shore". we should go forward in our battle, no matter what. we may have a melee or an injury, but the goal should be to bring awareness among the masses that diversity is not something to make divisions among people, instead it is to show the unity among such diversities. Everything is unique in its own way.

India, or we can say Kerala has been undergone

manifests of disasters. The tsunami which happened almost 2 decades ago. Then the octbi, flood in 2018, followed by landslides and drought and atlast the world-~~the~~ pandemic that shook the world - covid 19. It was the most proud moments of all keralites, something that we could be orgulous about, that we stood as one despite all the diversities - the mindset of people were one. Their thoughts were one. Their actions were one. They showed us unity in diversity. This shows us that diversity can also unite people not only divide.

The government and the economy is also a factor of the topic. Being the largest democracy, Indian economy was is also having diversities.

The constitution Art of India has made sure that all ba everyone has equal rights and justice.

But it is to take in mind that the same government divides the people on the basis diversities. They play deaf and dumb towards the issues. But it is not the case always. Government has taken

Some pre measures and steps to make the people understand that we are one. If the government and the society comes together, we can surely make this place a better one. The main objective of the processions and awareness classes conducted under the control of government. An exuberant youth also plays a major role in the matter.

we know that 69% of the world is filled with youngsters under the age group of 25 years. If they can come together to take care of the issues faced due to divisions among people because of diversity, that would be counted as the most efficient movement from the people. Because when the youth develops, the country also develops greater.

Diversity exists for the sustainability of all kinds. Including biodiversity. There should be no room for extinction. A better development can be made possible through diversity.

Sustainable development, which means to use and develop the present generation by meeting its need without ignoring the needs of future generation. The UN General Assembly has declared 2022 as the International year for sustainable development. There are 169 targets and 17 sustainable development goals. We can say that one of important one among SDGs ~~are~~ is to be united in diversity. This merely shows the interest of the government of various countries in the topic.

If we go back through time, we can always see the pangs of agony of being enslaved under the British colonial rule for 190 years. Those scenes would be highlighted always. Those people who saved the people from being divided under such diversities would always be resting in our hearts. Their sacrifices' value should be outweigh the divisions in diversities.

From my point of view, diversity ~~chappene~~ exists for the good. A garden with all kinds of flowers is better than a garden with all the flowers of the same kind. This is the conclusion that I came into, in terms of diversity. The ~~an~~ I concur with the fact that diversity unites and divides. But to unite and to divide, it always lies with people. That particular freedom is ours. People who misuse that freedom, ends up concluding that diversity divides. But we should always see both the sides of a matter always. Thomas Jefferson once said that "The will of the people is the legitimate power of the government. To protect its freedom of expression should be our first objective". This made me think that even if diversity unite or divide, the will of the people is what matters always.

We know that in this world where many crimes, ~~and~~ attacks and deaths are happening day to day because of issues ~~is~~ being a muslim

hindu or christian , we may not find it surprising that people dies . But take into consider the tears and sacrifices of our ancestors . The whole plethora of emotions . A squintillating and astute person will never try to make those fights a waste of time . When the diversity tries to divide , hold each other the hands each hold each others' hand and form a wall to show that we are united . without being united , nothing can be separated first of all . Let the hands remain the same .

Science and technology has also been advanced ubiquitous . It is being something as becoming an indispensable factor for a bright future . A Consequently , Artificial Intelligence is also taking a step forward in every aspect of our life . Even in the education sector . 'Eyes work more than ears' is the mantra behind it . Here , my fear is that , by 2029 Artificial Intelligence will overwhelm the world . Human beings having slow biological evolution will

- Soon come to an end. The diversity will have an extinction if the AI takes the over the world. the whole scenario will be changed. This is the point of view of Ray Kurzweil, a futurist. It is true that so many useless things can destroy so many useful minds and people.

When diversity divides people it can cause many problems worldwide. The economy and education will mainly be affected. The HRD, Human Resource Department has concluded that development among individuals will be put a cessation. This will adversely affect development worldwide too.

It is our duty to be united among everyone. The manoeuvre of our government will surely help our country to move forward. Never hesitate to remonstrate against anything that you think is not right. Even though everyone averse you, the path you chose may be the right one. Even a small ripple in the water can make

a sound one by one we can make difference
by taking small steps. "Two roads diverged in a
wood and I, I took the less-travelled by and that
made the difference." I completely concur with
Robert Frost. Even in diversity, people can be united.
It doesn't count by the look of the path we take,
it all lies inside the very corner of our heart,
the thing which makes all the difference - "^{our}will".
