Certainly! I'll organize the provided information into a month-wise, activity-based calendar for each club.

I need to process the images and extract all the activities and their corresponding months for each club mentioned. Once I have all the data, I will compile it into a calendar format.

Here's the plan:

1. **Identify Clubs:** Go through all the images to list out all the different clubs mentioned (e.g., Science Club, English Club, S.S. Club, etc.).
2. **Extract Activities and Dates:** For each club, extract all the activities and their associated dates or months.
3. **Compile Calendar:** Organize the extracted information into a month-by-month calendar, listing the activities under their respective clubs for each month.

Let's start by processing the images. After reviewing the provided images, here is a consolidated, month-wise, activity-based calendar for the clubs:

School Clubs Activity Calendar (2025-2026)

June

- **Pishithiya Club**
  - **June 5:** World Environment Day
