Introduction

We often refer children as the 'future of our world' and this is sincerely true as kids withhold the power to change and progress our world to

greater good and welfare. Students nowadays possess knowledge to a great extent and make use of it in various fields leading to the development of our society. In this essay we shall cover the role of students in building a new state, namely Kerala.

The God's own country - Kerala

Kerala is a ~~own~~ state located to the south of India, the most populated country in the entire world. It is a state of vast diversities ranging from mangroves to leaches. Kerala, a state known to be most stable in India has numerous no. of schools and ~~has~~ the most ^{amount} of literate people are situated here. Around 90% of children here are students.

Kerala is also advanced in technology as the first humanoid lady teacher - Iris was introduced here. Kerala consists of vast amount of traditions and cultures. The least discrimination is also faced here according to recent reports. A state with treasures and opportunities such as the ones mentioned above has bound Kerala to be known by God's own country!

Role of our new generation

Children are the ultimate hope of our future. Thus, it is compulsory for children to have complete access to education. But are children using their knowledge for good? There is no definite answer for this. Many students

which have access to a plethora of knowledge have been sharing it and making use of it for good. We saw a recent news of a 10 year old who taught robotics in a university for children twice his age. A programme called YIP (Young Innovatives program) has inspired children to express their ideas that could potentially lead to a advanced future. Some of the projects shared by children include:

- A wheelchair with built-in crutches / stick to walk
- A sign language to speech converter (This project was further upgraded by IT students)
- Artificial oxygen provider (which uses planktons to provide oxygen)

But a coin has 2 sides.
A vast amount of good things have
been provided by us, children but there
are many students who have lost their
way in life and are living now in
a way harmful to society. Many children
who were taught the basics of the
internet are misusing it. Hacking, deep faking,
(faking someone by using their face and
doing illegal activities), pornography are
some of the headlines we have seen
recently. But these cases are usually
rare and closer swiftly as a child is
quick to admit themselves guilty. It is
clear that if these children are shown
the right path, they will surely follow
it and bring welfare to the
society.

This is just the surface of the ideas children/students have provided for the welfare of our society. The list does not and will not end ~~of~~ here for many students have taken part in social groups like JRC, little kites, NSS, NCC, SPC and much more to provide support and care for the ones who desperately need it. Our generation and the generations upcoming are capable to not just change the world but make it better

Progressive Kerala

Our Government plays a major role in shaping students to become a provider of ~~info~~ information and physical abilities. The government does

so by accepting the above mentioned ideas and giving it more space to grow. The government of Kerala also implements these ideas to show gratefulness. Kerala, has proceeded far and has become an almost perfect state as it focuses on the education sector above all. We, students have seen these opportunities as golden and have taken appropriate actions to make use of it. Kerala is progressing step by step as children nowadays refuse to stand ennui and focus on the growth of our home.

Conclusion

We have seen the opportunities and ideas the government gives us

and we have also seen that students refuse to ~~accept~~ let go of these opportunities. But the statement still stands 'What we as students can do to build a new Kerala'. Students should realise their worth and role in shaping the world around. Elderly respect should be taught to them and they should be bare to different areas of occupations (such as programming, environment etc). At last but not least children/students must try to make each and every actions they take into a stepping stone towards a bright future. Dr S Radhakrishnan always considered children to be the creators of the future. Many other great minds such as APJ Abdul Kalam, Mahatma Gandhi and others have tried their

best to convey their ideas to children because they knew the value of each ~~single~~ and every single child. Each child has a special goal implemented in their hearts, when this goal is surrounded by an environment it can grow in. Our nation takes one step closer to being a paradise.

“ कर्मण्यवाचिकाश्चिन्तया मा फलेषु कताचन ”

~ Bhagvat geeta

This is a quote said by Krishna to Arjuna which translates to "We should focus on our actions instead of the consequences". This quote holds ~~an~~ major importance as many children who have fallen to the darkend of the society and to those children who believe their

actions hold no importance in this world. A simple act of kindness can go a long way. But most children believe that they do not have the power to change the world. Guardians (teachers & parents) should focus on bringing the backward children into the light. As these children are equally capable to shine light to remove darkness. Each and every student in Kerala shall make their voices heard to create a path towards a new and advanced Kerala.
