THE REAL WEALTH

One day, a rich man decided to take his son on a trip to the country. The wealthy man wanted to show his son how the poor people live so he could be thankful for his wealth.

They spent two days on a farm of a very poor family. on their way home the rich man asked his son, "how was our trip with this poor family and what did you learn?".

The son answered " I saw that we have servants to serve us, but they serve others. we have one dog and they have four. We have imported lanterns in our garden and they have stars at night. We buy our food, but they grow theirs. We have a big pool in our garden, but they have a creek that has no end. We have large walls to protect us and they have friends to protect them" finally the son added, "Thanks dad for showing me how poor we are.

AMAN RAMZI K

THE PROUD ROSE

Once upon a time, there was a beautiful rose plant in a garden. One of the roses on the plant was proud of its beauty. However, it was disappointed that it was growing next to an ugly cactus. Everyday, the rose would insult the cactus about its looks, but the cactus stayed quiet. All the other plants in the garden tried to stop the rose from bullying the cactus, but the rose was too swayed by its own beauty to listen to anyone.

One summer, a well in the garden dried up and there was no water for the plants. The rose slowly began to wilt. The rose saw a sparrow dip its beak into the cactus for some water. The rose then felt ashamed for having made fun of the cactus all this time. But because it was in need of water, it went to ask the cactus if it could have some water. The kind cactus agreed, and they both got through summer as friends.

MORAL

never judge someone by the way they look!

- NIHMA M

THE POWER OF TEAM WORK

Once upon a time, there was a little ant named Andy. Andy was always busy collecting food for the ant colony. One day, he came across a big piece of bread. Excitedly, he started pushing it towards the colony all by himself. Along the way, he met a group of ants who offered to help him. Andy feeling proud and independent, refused their help and continued on his own. But as he struggled to move the bread, he realised that team work would make the task much easier. He humbly accepted the help of the other ants. Together, they successfully brought the bread to the colony.

MORAL

Team work and cooperation can lead to greater success than trying to do everything alone.

- FATHIMA SHIFNA P

THE DAY

It clears. And the sun
Throws lights on the dust
On the windows, the
Constancy of that mist.
To see "if the weather is with us"
And it is amazing how much
a window letd in
or out. part of a
cross from a tower
on a puddle on
a connecting walk,
white waterpipes that
Slide up sides of
whitebuilding to tie
tin cornices to
ground , other window
polished by indi-
reactions of reflec-
tions. Quiet.
The sky.

THE COMPUTER

The computer has become a part of the media only in recent years. In the 1960s and a '70s, computer were mostly used by big companies and businessmen. Very few people could buy a computer to be used at home.

In the 1980s and '90s, there was an incredible growth in computer sales. The popularity of the internet, the world wide web the e-mail have made computers inevitable in the modern world. Have you ever thought about advantages of the internet, it helps millions of people to communicate with each other quickly and cheaply. Moreover, it enable quick access to knowledge.

The first mechanical adding machine was made by pascal in France, and improved upon by Leibniz who made the first calculating machine, called the 'difference engine', in 1822. later, he designed the even more powerful 'analytical engine', but could not get it made. Its basic design is remarkably similar to the modern electronic computer.

-MUHAMMED SHMEEM

RHYTHMS OF NATURE

In spring times embrace, blossoms
unfold,
Nature's canvas painted in hues of gold
summer's warmth blankets the earth
below,
a symphony of life in a vibrant flow

autumn whispers tales of falling leaves,
crisp air dances, as the landscape
grieves
Winter's chill, a serene, icy embraces
A tranquil beauty in a frosty grace

- NADIYA NOURIN TV

MAY

May is the month
of sunshine and flowers,
birds in their nest,
and one or two showers,
games to play and kites to fly
or just looking at the sky
we could spend a year this way
if the year were made of May

- MEGJITH

MAGICAL DREAM

On my.....dream
When i go to bed
It come in my sleep
May be it is true
Or it be false,
But i think it,s true
Which come in my sleep

There are many of them in world
It make us happiness
With pleasure
Which come in my sleep

On.....my dream
When i go to my bed
It come in my sleep

Muhammed Riswan.M

THE GOLDEN TOUCH

There once was a king named Midas who a good deed for satyr-a spirit a spirit of nature. Dionysus, the god of wine, then grand him a wish. For his wish, Midas asked that whatever he touched would turn to gold. Despite Dionysus efforts to prevent it. Midas pleaded that this was a fantastic wish, So it was belowed exited about his newly-earned powers. Midas started touching all kinds of things, turning each item into pure gold. But soon, Midas become hungry, as he picked up a piece of food, he found he couldn't eat it. It had turned to gold in his hand. Hungry, Midas groaned, "I'll starve perhaps this wasn't such an excellent wish after all!" seeing his dismay, Midas's beloved daughter threw her arms around him to comfort him, and she, too, turned to gold "the golden touch is no blessing". Midas cried. Moral: greed will always lead to down fall.

- RANIYAH PALAKKAL

INK AND SILENCE

In the hush of dusty shelves,
a bookworm finds their solace dwells.
Pages turn, worlds unfold
In silence, stories are told

In introvert's retreat, they roam,
lost in tales, far from home
among the whispers of paper and ink
a bookworm finds solace, a place to think

- SHAHANA SHERIN P

HUMAN ROBOT INTERACTION

H
R
I

Human Robot interaction has recently received considerable attention in the academic community, In labs, in technology compa-nies, and through the media, because of this attention, it is desirable to present a survey of human robot interactin (HRI) to serve as a tutorial to people outside the field and to promote descussion of a unified vision of human robot interaction (HRI) within the field, the goal of this review is to present a unified treatment of human robot interaction (HRI), related problems to identify key themes, and discuss challenge problems that are likely to shape the field in the near future, Although the review follows a survay structure, the goal of presenting a cober-ent 'story' of human robot interaction (HRI) means

that there are necessarily some well-written ,intriguing and influential papers that are not referenced, instead of trying to survey every paper , we describe the human robot interaction (HRI) story from multiple perspectives with an eye toward identifying themes that cross appli-cations the survay attempts to include papers that represent a fair cross selection of the universities , government efforts, industry labs, and countries that contribute to human robot interaction (HRI) and a cross section of the disciplines that contribute to the field, such as human, factors, robotics, cognitive psychology and design.

HOW BEAUTIFUL THAT MORNING WAS

In an early morning when I
woke up early in my life
I realised the beauty of the world
and its talent to attract all

The chirping and squabbling of birds
The dancing of branches in the breeze
The cla-cla sound of flowing stream
and the joy of sun to rise up

when I looked at the garden
I saw different kinds of flowers
I saw a group of roses, that
enjoying the beauty themselves

- FATHIMA DILFA CK

HEAVEN OF EARTH

"When i come to school",

I saw the tiny shrubs and big trees

welcome me to this hold....

Yes it was a beginning

Of a new great life....

Further days, months and years

Wore rushing rapidly

Yes i was beginning yielded

HEART BEATS...

It was a calm morning
In the June 2021
I impressed my feet on
The golden soil
of V.H.M.H.S.S
My mind was getting accentuated
And senses were competing to absorb
It's charming beauty...
Loneliness dreams arose
From the depth of my heart and
I saw the tiny shrubs and big trees
Welcome me to this hold...
Yes.. It was the beginning
Of a new great life...!
Further days, months and years
Were rushing rapidly
Yes- I was being yielded
By the laws of nature
Unknowingly, I grew up
My mind, Thoughts everything charged
What I acquired from here
Is beyond words...
I could see new drops of excellence
I could smell the fragrance of education
I could taste the nectar of humility
I could hear the fine notes of knowledge
I could touch the soft layers of innocence
My God, may this soar to heights always...
Then it is the " HEAVEN OF EARTH"

MAHROOF C

FLY

When i was reading a book
a fly jumps and flies in front of me
It was the time of darkness
the dim light of a candle
from this, I can see him play
by seeing him play, I thought
whether he know fire makes him burn

I think he doesn't know
he flew down to my book
I looked at him, his small wings burned
Hands and legs moved fast
then stopped, went to deep sleep
and I witnessed a death, still
the candle glows, throws fire on the fly.

- DILAN RAJ

DREAMY WORLD

I dream a world filled with love
spreading the message of peace with dove,
more greenery, more fresh air
no pollution anywhere.

A world of Disney and Wizards
having Mickey, Donald and Harry Potter pictured
entertainment for everyone
The world is filled with so much fun.

A world full of adventures
which leads me to find treasures
when my dream gets interesting
then i wake up with my window glistening

- WASIL K

DREAMS COME TRUE

Feelings that once were hidden
are now expressed to you
days that once were stormy
are now the brightest blue.

Times that once were lonely
are now the brightest blue
All that once was mine alone
are now things we both treasure

Night that once was cold
are now comforting and warm
Tears that once was very real
are now gone with the storm

A heart that once was broken
can now finally mend
A person once alone in life
can now call you a friend

dreams that once were longed for
are now all coming true

- MUHAMMED ARSHAD NM

DREAMS

Holds fast to dreams
For if dreams die
Life is a broken-winged bird
That cannot fly

Hold fast dreams
For when dreams ago
Life is barren field
Frozen with snow

FATHIMA SHIRIN.CT

DON'T GIVE UP

A long time ago, there lived a boy named Rodney in a village. He was very happy with his family. But his happiness could not last for long. Rodney and his fellow villagers faced a drought. They desperately waited for it to rain, but with no luck. All the crops, land and even trees dried up. The cattle started dying. As there was no rain, the stream was drying up slowly.

One night, during a meeting in the village, Rodney said, "Friends, we all have heard tales from our grandparents about an underground river flowing through our village. Why don't we dig and see." the villagers agreed and started digging. They dug for some days, but gave up soon. However, Rodney kept digging. When people told him to give up, he said, "God is helping and guiding my way."

One day, when he had dug deep enough, Rodney saw water. His attitude of not giving up saved the whole village. "Never give up so easily", he advised the villagers. Now, they are never short of water and whenever any problem rises, all the villagers come up together and find a solution.

- HASHIR ASHRAF

CLASS ROOM

When I sate in the bench
I heard a thousand mixed sounds
when I look around the classroom
All students are chilling

When I saw a lot of new faces
But no one to look at me
Then I look at the nature
that was smiling upon me

when I saw the golden soil
of my heaver
my mind was getting accentuated
and senses were competing to absorb
its charming beauty.....!

- MUHAMMED NAJMU SWABAH

A PRAYER IN SPRING

Oh, give us pleasure in the flowers to-day;
And give us not to think so far away
As the uncertain harvest; keep us here
All simply in the springing of the year.

Oh, give us pleasure in the orchard white,
Like nothing else by day, like ghosts by night;
And make us happy in the happy bees,
The swarm dilating round the perfect trees.

And make us happy in the darting bird
That suddenly above the bees is heard,
The meteor that thrusts in with needle bill,
And off a blossom in mid air stands still.

For this is love and nothing else is love,
The which it is reserved for god above
To sanctify to what far ends He will,
But which it only needs that we fulfil.

THE GROWTH OF TECHNOLOGY AND AI

Technology and artificial intelligence (AI) have experienced exponential growth in recent years, revolutionizing various aspects of human life. This essay explores the remarkable advancement made in technology and AI. Focusing on their impacts and potential implications.

Increase In Computing Power.

One of the primary drivers behind the growth of technology and AI is the rapid increase in computing power. Moore's law, which states that the number of transistors on a microchip doubles about every 2 years, has held true for several decades. This exponential growth in computing power has allowed for the development of more complex algorithms and the processing of vast amounts of data in real time.

Advancements In Robotics

Robotics is an integral part of AI development, allowing machines to perform tasks autonomously. Various sectors, including manufacturing, health care and entertainment, have witnessed remarkable advancements in robotics. Robots are increasingly performing complex tasks with precision, speed, and efficiency, reducing human involvement and enhancing productivity.

Machine Learning And Deep Learning

Machine learning (ML) and deep learning (DL) are subsets of AI that have gained significant attention. ML algorithms enable computers to learn and make prediction based on patterns and data without explicit programming. DL, on the other hand mimics the working of the human brain's neural network to solve complex task.

Internet of things(IOT)

The internet of things have played a crucial role in the growth of technology and AI by connecting various devices, senses and systems. This interconnectedness allows for seamless communication and data exchange leading to more informed decision-making. IOT has brought forth substantial advancements in smart homes, cities and industries, enabling automation and optimization of processes

Ethical and societal impacts

While growth of technology and AI offers numerous benefits, it also possess ethical and societal challenges. Concerns regarding data privacy, security,

job displacement, and AI bias have emerged. Striking a balance between technological advancements and ensuring ethical practices is crucial to harnessing the full potential of AI for the benefit of society.

Future Implications

The growth of technology and AI is expected to continue at an unprecedented pace. With further advancements in quantum computing argued reality and intelligent system. The possibilities appear boundless.

Conclusion
