COVID 19

COVID 19 is an infectious disease caused by a newly discovered corona virus. It was first detected in Wuhan, china on 31st december 2019. On 11th february 2020 WHO named this new corona virus as COVID 19. Even if the death rate is low the virus spreads rapidly all over the world. Almost 200 countries are effected by this virus. It is mostly affected in Europe countries. Especialy in Itally, Spain and England. Tha death rate is very high in Italy and Spain. America was also effected by corona virus very badly. Almost 17 lakh confirmed cases and 1 lakh deaths were reported by the countries and teritories all over the world. More than 4 lakh cases were reported in America itself. A vaccine or medicine for this virus has not been found.

In January, first corona case was reported in Kerala, India. Gradualy this virus spread all over India. Kerala fought against this virus stronglyand we were able to control the spreading of corona virus. The medical department and the police together took the precautions to avoid the sprea of this virus. The whole nation was said to to go under lockdown for 21 days. The virus spread rapidly in Maharashtra. The most number of cases were reported here. By 11th April 2020, 6565 cases were reported, 642 people were cured and 239 people were dead in India. The number of people getting cured from the virus is increasing in Kerala. There were 365 confirmed cases in Kerala 124 people were recovered and 3 men died. The most number of cases were reported in kasargode

The government of Kerala confronted this virus effectively Even Great nations appreciated our government, medical team and our health minister Shailaja teacher. There is no cure for this virus. The only way is to keep social distance and avoid the spreading of this virus. Let's fight against this virus together.

"STAY HOME
STAY SAFE"
