

Modern Technological Development And Human Values

2705
2082

Science and technology are the backbone of civilized Nation. Nowaday's technology is rapidly increasing and certain human values are diminished from the society. But technology should be used for the welfare of the nation not for its disentegration. But human's are only concentrated to produce and make deadly Nuclear weapons. We all know about 'Hiroshima' and 'Nagasaki' places in Japan which faced a severe and historical Nuclear Accident. 'Little boy' and 'Fatman' are two nuclear forces who done this. Patience can make Nation peaceful and healthy but war cannot make a peaceful ~~atmos~~ atmosphere. Today in the modern world we have to encourage and support human values.

Role of human values in the Modern World

Today in the modern world human values are diminishing.

~~Human~~ are always greedy and have selfish mind. This often create problems in the society. Google, whatsapp, youtube, twitter ~~are~~ are the most demanded mobile apps all over the world. But today most of the people are misusing them.

However we can't live without any technological development. Human values are just like waste in the modern world.

Development and progress are the only subjects that are debated in nowadays. But Technology is only possible through proper communication and vice. Without human values our world and society will become a war field.

B Technology and human values are interconnected. Today most part of the world including our Kerala is under the control of unscientific Development.

Importance of Human Values

Code no 13

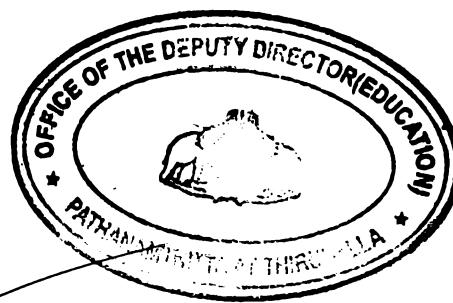

One cannot live without the support of community. Hope is the best medicine to overcome the difficulties of life. Nowadays the strength of relationship and the lack of love creates problem among society. But there is a best medicine to overcome the present difficulties. That is 'Love'. It is not a scientifically proved medicine. But it can change the whole world. By living in a developing and busy atmosphere we often forget to think about the world outside us. There are still millions who need our love and support.

Somalia and Human Values

Now we are living in a developing Country. But there are some places who need our love and support. We have heard about Somalia: A country that facing poverty. Millions of women, men, children are dying with starvation. But we are wasting our time in an improper way. We can help them with our love and effort. Donating some Money or giving some time.

Sometimes we can make our surroundings well by giving love and hope to them. We can change the face of Somalia by giving them our love and hope.

Code no-13

But we forget everything when we are selfish. Not only technology can save this world but also human values.

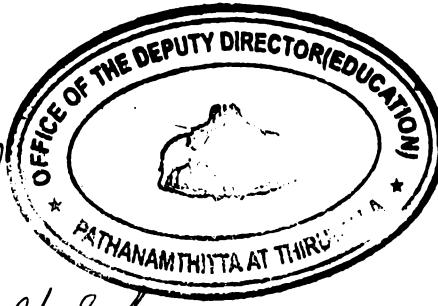

Mosabik And AK47

There is a country that have the symbol of AK47 in its flag it is mosabik. you are thinking that what's the matter then?

But I can say there is! Because the basic needs of man is food, air, shelter, water.

But there is one more thing that can be added to this it is 'peace'. because people often like to live in an peaceful atmosphere. But Wars and murders cannot create peace. They do not think about human values they are only concentrating for conquering other countries in a negative way. But Technology cannot make the society connected with the gun of love, peace and hope. They can only make progress.

Dynamite, Radium Milestones in Code no - 13
the Technological Development

Dynamite is a serious chemical that has discovered by Alfred Nobel.

This creates serious problems among society.

This has taken the life of millions of people.

Alfred Nobel was depressed and sad later because of the discovery of dynamite. Radium ~~was also~~ Because he knew that, dynamite can earn only the difficulties of millions of problems but human values can create love among society. Radium is discovered by Mary Curie who did many helping activities during the time of 2nd World war.

Gandhi the Messenger of Human Values

Gandhi is popular not only in India but also all over the world. He is recognised and identified due to his different personality.

He personally encourages, love, Nobility, Service etc. And he become the father of Nation. He is remembered all times because of his great human values. He follows human values and always tell that truth and peace are the most good weapons.

Mother-child Relationship,
husband-wife Relationship

everything is disappearing due to the developing
of technology. Most of the people are running
in ~~the~~ between the four walls of the rooms.

But Technology should be properly used for
the sustainable development of the whole world.

Mother Teresa is the best example for the helping
Mentality. She protected and care depracy patients.

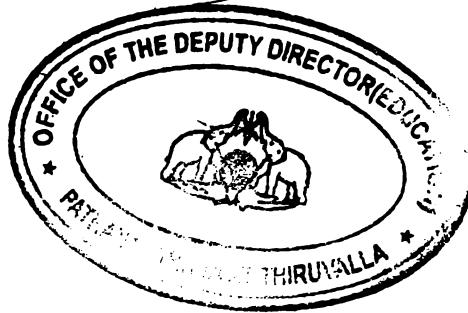

And proved us that, Caste, Colour, Gender, Religion,
and sex is not the ~~base~~ basis of love. If we
have the Mentality to help then every obstacle
will fall down. That's why sometimes technology
~~is~~ goal and human values will gain success.

Technology will open windows to the world
but not opening windows to the mind. we should
move forward with lot's of love and hope.
U.S.A did not think about human values
when they drop atom bomb and satmar.

We are developing in every field like, Health
Sports, Education, Defence etc like that. But
~~we~~ on the other hand we are going
backwards when think about human values.

Third World War

Code no - 13

3rd world war is the most debated topic in the society.

Sometimes we will say this will definitely happen.

But I can say that this will not happen if human values come back. Love, proper communication, hope etc can change this world. Technology will develop but if our values are strong as iron then none can break that. U.N.O is most familiar and always ready to give solution to any problem and to maintain the peaceful atmosphere of the world. Antonio Guterres the Secretary of U.N.O is hardworking for the Nation.

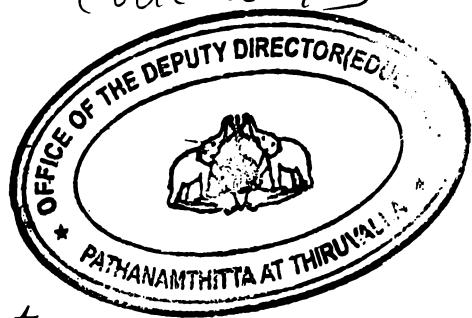

Mistakes are familiar in the human life. But to realise that and change them is not popular.

Selfishness and greedy mind create problems. But if human values are used properly then it will be alright.

Conclusion

So far we have discussed about Technology and human values. From this it is clear that this is interconnected. Human values are disappearing from the society. And Technology is rapidly increasing. peaceful atmosphere of our society, to our country, our world is breaking.

Code no - 13

We have seen the flood affected our Kerala. During that time people live together, sleep together, eat together without any discrimination. This is the best example for the greatness of human values. Let's support and encourage human values. Technology will go when a flood, Tsunami, or Earthquake occurs but human values are things without death. Let's go forward with love and support. There are great personalities who always want human rights reach and dreams so society mere people live together with human values. So let's dream a magical world were truth; peace, love and humanity sustains.

Thankyou.
